Please Read Before Ordering

DELIVERY OF SEEDS

All Vegetable and Flower Seeds in this price list except Peas, Beans and Sweet Corn will be sent to places in the United States transportation charges prepaid. We will ship by parcel post, express or freight at our option. If seeds are ordered shipped by express where we would ship by freight, they will be sent by express collect.

Peas, Beans and Sweet Corn will be shipped at purchaser's expense, except as follows: If these seeds are included in any one order amounting to \$20.00 or more (not including Farm Seeds, Accessories, etc.) we will prepay transportation charges.

We will not pay transportation charges on Field and Grass Seed, Potatoes, Onion Sets, Accessories, etc. These articles are always sent at purchaser's expense, except where quoted Prepaid. On these items, specify parcel post, express or freight. (Mail now costs less on shipments under 70 lbs. up to about 300 miles from Rochester, N. Y. Ask your post office for rates and include approximate postage with your order.)

When ordering seeds shipped by freight or express please be sure to give the name of your nearest freight railroad station or express office if it is different from your post office address.

Freight shipments are still slow and even mail and express are sometimes delayed, so please send in your order well ahead of the time you wish to use the seeds.

TERMS AND DISCOUNTS

Cash Discount 3%

Our regular terms are cash with order, for which we allow a discount of 3% on vegetable and flower seeds and plants only.

No cash discount is allowed on Potatoes, Field Corn or Field Seeds, Grass Seeds, Insecticides and Accessories. All these items are strictly net cash with order at prices quoted.

C.O.D. SHIPMENTS. 25% of the value of the order must be sent with all orders for goods to be shipped C.O.D. No cash discount is allowed on C.O.D. shipments. Orders are handled more quickly and are less subject to delay if full cash payment accompanies the order.

Plants, roots, potatoes, onion sets, etc. will not be sent C.O.D.

To **Market Gardeners** of established credit and those who furnish us with satisfactory references, we allow the following time payments on vegetable seeds and plants: (*Field and Grass Seed, Potatoes, etc. are strictly cash with order and may not be charged.*)

Bills for seeds, plants, etc. shipped after December 1st are due and payable **net** August 1st.

Bills for goods shipped after August 1 are due **net** December 1st.

To **Florists** of established credit we allow the following time payments on flower seeds and plants:

Bills for seeds, plants, etc. shipped after December 1st are due and payable **net** June 1st.

Bills for goods shipped after June 1st, are due **net** December 1st.

CONDITIONS OF SALE

All the seeds we sell are known to be of good vitality and will grow under normal conditions. They are all tested and the per cent that germinates is marked on the package or label.

We assume responsibility of the seeds, plants and bulbs reaching the purchaser in good condition. However, in common with all responsible seedsmen, we give no warranty, express or implied as to the productiveness of any seeds, plants or bulbs we sell, and we will not be in any way responsible for the crop. Our liability in all instances is limited to the purchase price of the seed. We will not accept or fill orders under any other conditions.

HARRIS SEEDS

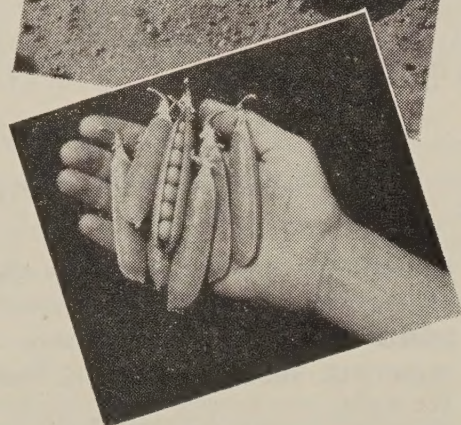

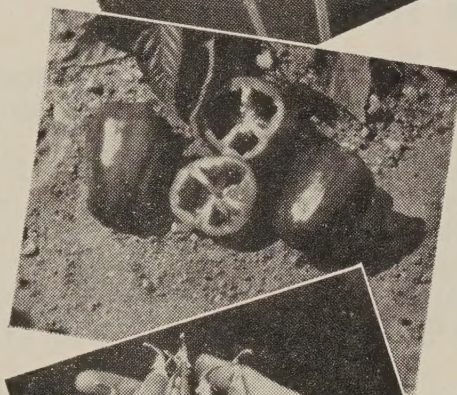

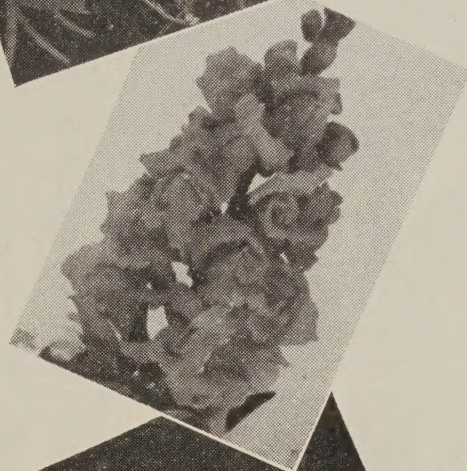

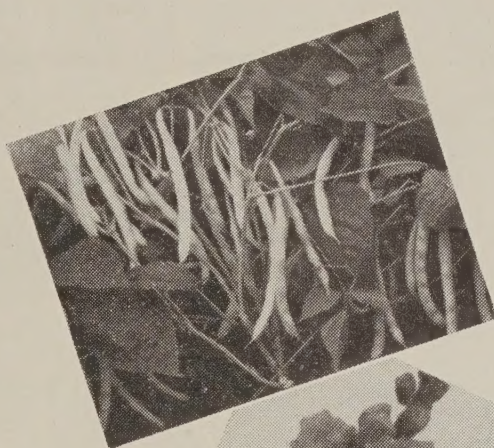

1947 PRICE LIST FOR MARKET GARDENERS, FLORISTS

Progressive growers always seem to be interested in new varieties. They are on the lookout for the new introductions that may turn out to be the right answer for their markets or for their problems of weather and disease, and they make every effort to keep up with the constantly changing picture of vegetable production. We believe that it is the duty of every reliable seedsman to select with great care the varieties he introduces. He must know what his customers want and must, in fact, be able to anticipate their needs. If he decides to offer any of the dozens of new varieties that appear every year he must choose them—not from the standpoint of mere novelty or because they have one or two good features—but because he is confident that they are a great enough improvement over some of the old favorites to be of real value to his customers.

This critical selection keeps our list of varieties comparatively small and the new introductions at a minimum, but we are sure that each one has real merit. In this catalog we are listing an unusually large number of new vegetables and flowers which we believe can be raised successfully and profitably by Northern growers. Look them over to see where they will fit into your growing program. Some of the old standard varieties are so good that they have no rivals among the new strains offered. Harris' Detroit Beet, Danish Ballhead and Blue Hubbard Squash are among the strains that are still tops, because we are constantly selecting and improving them here on our own farms.

But old or new, the items in this catalog will have real worth for you. You will find that Harris' Seeds are clean, dependable and true to type and they are grown in the North for vigor.

Top to Bottom: BEANS, Cherokee, page 3. SNAPDRAGON, Velvet Giant, page 45. SCABIOSA, Imperial Giant Mixed, page 44. PEPPER, Pennwonder, page 24. PEAS, Freez-onian, page 22.

ORDER BY MAIL

It is the easiest and most convenient way to get the seeds you want. Mail orders are filled promptly and accurately and you can depend on getting the best obtainable when you order Harris Seeds. In spite of the best service we can give you, we still advise ordering early, and making allowance for possible delay in shipping.

EVERY LOT OF SEED IS TESTED

We make a special point of running careful germination tests on every lot of seed we send out. We use both germinator tests and also actual soil tests planted in the greenhouse. In all cases the results are *plainly marked on every package of seed*. Use these tests as a guide when planting in order to get good stands.

PLEASE NOTE: All prices here quoted are subject to change without notice and to our stocks being unsold. For prices of seed in quantities less than listed here, please refer to our general catalog.

ASPARAGUS

204 MARY WASHINGTON. Large Early and Rust Resistant.

This variety is the best and most widely grown kind of asparagus. Our seed is the true strain and will produce the finest large stalks.

Oz. 20c; ¼ lb. 65c; lb. \$1.90; 10 lbs. \$17.50.

For roots, see page 35.

BEANS

One pound of beans will plant 150 ft. of row. 60 to 75 lbs. per acre.

LONG TENDERGREEN

28 French Horticultural

Harris' Special Strain

Developed and grown entirely by us, this is by far the best strain of French Horticultural available. The pods of this outstanding shell bean are long and uniform with superb scarlet coloring and exceptionally heavy yields. Particular growers find Harris' Special Strain fully equal to the finest of the jealously guarded "private stocks." See prices below.

50 Long Tendergreen

Also Called "Longgreen"—All America Winner.

If you want a long round-podded green bean, you will do well to grow our Long Tendergreen. Introduced by us only a few years ago, this variety is already by far the most popular in its class.

The extra long pods are round, very thick meated, straight and handsome. They are just as fine in every way as the original Tendergreen, but are much longer, averaging a full inch greater length. This extra size gives them an unusual and striking market appearance for a round bean.

The quality is excellent, entirely stringless and with rich tender meat. Everyone likes these fine beans and they sell at the top of the market. See prices below.

18 Bountiful

The Most Profitable Flat Green Bean to Grow.

Big yields and handsome appearance make Bountiful year after year one of the most widely grown and popular beans with market gardeners all over the country. The pods are light green, straight, flat and entirely stringless, and mature very early, several days ahead of most other varieties.

You can depend on heavy yields of attractive beans from our stock, which is outstanding for vigor and trueness. The robust vines are upright in growth and produce large crops under a wide range of conditions. For market, we regard Bountiful as one of the best and most dependable of the green beans. See prices below.

Note: Good seed beans will be scarce in 1948. We suggest you order early.

DWARF GREEN-PODDED BEANS

25 lbs. or more of one variety of beans will be supplied at 100 lb. price. A bushel weighs 60 lbs.

		NOT PREPAID* (See below)				
		1 lb.	7½ lb.	15 lb.	100 lb.	500 lb.
18 BOUNTIFUL. Selected Stock. See above.....	\$.45	\$2.50	\$4.65	\$28.00	\$135.00
28 FRENCH HORTICULTURAL. Harris' Special Strain. See above.		.55	3.00	5.70	35.00
50 LONG TENDERGREEN. See above.....		.50	2.75	5.25	32.00	155.00
60 PLENTIFUL. Hardy and prolific. Fine quality.....		.45	2.50	4.65	28.00	135.00
We highly recommend this extra fine flat bean for market and shipping. It combines good looks and high quality with vigor and productiveness. Pods longer than Bountiful, straight, thick meated and of fine flavor.						
80 STRINGLESS BLACK VALENTINE. Heavy Yields.....		.45	2.50	4.65	28.00	135.00
Prolific and profitable. Long straight, good-looking pods—nearly round when young, becoming oval to semi-flat as they mature. This is a splendid early-market bean.						
85 TENDERGREEN. Dependable Early Round Bean.....		.45	2.50	4.65	28.00	135.00
The leading round green bean for many years and still a great favorite. It is early, hardy and productive and the straight thick meated pods are of the finest quality.						

*Purchaser pays shipping charges on beans except as follows: If your order for vegetable seed including beans amounts to \$20.00 or more we prepay freight charges. (See also inside front cover.)

21 Cherokee Wax (New)

A Great Advance in Wax Beans

This new yellow bean is just as reliable and productive as Stringless Black Valentine, from which it was developed, and market growers have immediately recognized it as a real find.

You will like its vigorous growth, its heavy yields of smooth, 5 to 6 inch oval beans and its hardness in unfavorable weather. Your customers will like its fine quality and the even, smooth, clean look of its pods. Cherokee Wax should find a prominent place on many markets. Black Seeded. See prices below.

CHEROKEE WAX—Will find a ready market.

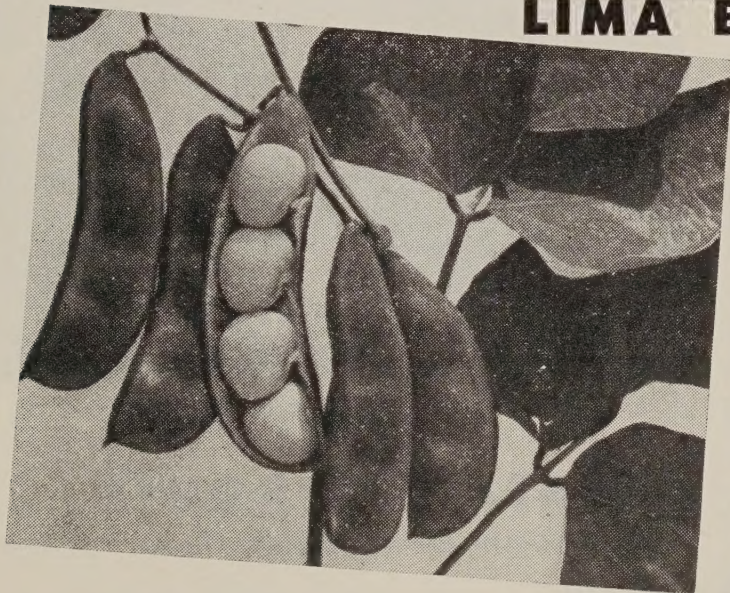

61 Puregold Wax (New)

Where quality counts most, this handsome round wax bean is well worth trying. In this area, it ripens a week or more later than Round Pod Kidney Wax, which it resembles, and has tender thick-meated pods of beautiful golden color. The vines are dark green, healthy and productive over a considerable period. Seed white with black eye. See prices below.

DWARF WAX PODDED BEANS

		NOT PREPAID* (See page 2)			
		1 lb.	7½ lb.	15 lb.	100 lb.
21	CHEROKEE WAX. (New) (See above).....	\$.55	\$2.95	\$5.55
55	PENCIL POD BLACK WAX. Best Round Pod Wax.....	.50	2.65	4.95	\$30.00
Grow our stock of Pencil Pod for its vigor, high yields and true type. Big pods, round and nearly straight. Thick flesh, clear yellow and of excellent quality.					
61	PUREGOLD WAX. (New) See above.....	.60	3.25	6.15	38.00
68	ROUND POD KIDNEY WAX or Brittle Wax. Finest Quality.....	.50	2.65	4.95	30.00
82	SURE CROP WAX. The Best Flat Wax Bean.....	.50	2.65	4.95	30.00
One of the most popular and profitable wax beans for its vigorous growth and enormous yields of long, straight flat pods. A superior stock of fine quality.					
88	UNRIVALLED WAX. Early—Fine Appearance.....	.45	2.50	4.65	28.00
A heavy yielder of attractive narrow, flat, clear yellow pods. Very handsome market appearance. A few days earlier than Sure Crop.					

LIMA BEANS

FORDHOOK U.S. 242—No better bush lima.

26 Fordhook U.S. 242

Uniform—Heavy Yielding—Dependable

Each year, more and more growers are planting Fordhook U. S. 242. It has proved itself more dependable, more productive and more profitable than any of the older kinds. It consistently sets big crops of fine beans even under adverse conditions, such as hot, dry weather. The large, vigorous plants produce heavy yields from the first picking right through till frost.

The pods are remarkably uniform—every one is good sized, nearly straight and closely filled with 3 or 4 choice, thick beans. The fine shape and size holds up even on the late sets, and the quality is excellent.

Our seed is the finest to be had and has already built a reputation for high yield and dependability. See prices below.

25 lbs. or more of one variety will be supplied at the 100 lb. rate. A bushel weighs 60 lbs.

		NOT PREPAID* (See page 2)				
		1 lb.	7½ lb.	15 lb.	100 lb.	500 lb.
23	EARLY MARKET.....	\$.50	\$2.75	\$5.25	\$32.00	\$155.00
A flat-seeded type, popular for its earliness, heavy yields and the fine green color of the beans. Long, dark green pods, 4 to 4½ in.						
25	FORDHOOK BUSH LIMA.....	.50	2.75	5.25	32.00	155.00
The old standard variety for market. High yields, uniformly large, thick beans, fine quality. Our strain has long been a favorite.						
26	FORDHOOK U.S. 242. Heavy Yields. See above.....	.55	2.95	5.55	34.00	165.00
33	Henderson's Bush Lima.....	.45	2.50	4.65	28.00	135.00
35	IDEAL or Mammoth Podded POLE LIMA.....	.50	2.65	4.95	30.00
Pods often 8 in. long, early and prolific. Best large podded Pole Lima.						

POLE BEANS

A pound of Pole Bean seed will plant 120 ft. of row or about 100 hills.

40 Kentucky Wonder—Harris' Special Strain

This special white-seeded strain was developed here on our own farms and it produces heavier yields and finer pods than any other. The tall vigorous vines are remarkably healthy and prolific and the pods are exceptionally long, straight and meaty. If your market wants Kentucky Wonder beans, this is the strain to grow. See prices below.

25 lbs. or more of one variety of beans will be supplied at 100 lb. price. A bushel weighs 60 lbs.

NOT PREPAID* (See page 2)

	1 lb.	7½ lb.	15 lb.	100 lb.
38 Kentucky Wonder. Also called "Old Homestead".....	\$.45	\$2.50	\$4.65	\$28.00
Long, slender, green pods of fine quality. Early and very prolific.				
39 Kentucky Wonder Wax. Flat yellow pods.....	.50	2.65	4.95	30.00
40 KENTUCKY WONDER, Harris' Special Strain. See above.....	.50	2.65	4.95	30.00
44 KING HORTICULTURAL. Harris' Special Large Seeded Strain.....	.55	3.10	5.85	36.00
Excellent as a snap or green shell bean. Large yields of long broad pods, straight and heavily splashed with scarlet; vigorous, healthy vines. Our special strain is early and large-seeded.				
75 SCOTIA. Fine for Roadside Markets.....	.50	2.65	4.95	30.00
Extremely prolific, with round slender green pods of the finest quality. Has proved very profitable as a high quality bean for discriminating trade.				

BROCCOLI

1 oz. of seed will produce about 2000 plants.

232 DeCicco (New)

The First to Market

Ready to cut a week to ten days before Italian Green Sprouting, this strain fills the need for a really good, extra early broccoli. With us, it has proved the earliest strain of commercial value yet developed. Each plant produces a large center head and many small side shoots, excellent for bunching. Plants are robust and of rather light green color.

Oz. 75c; ¼ lb. \$2.20; lb. \$7.50; 10 lbs. \$74.00.

230 Italian Green Sprouting

Calabrese Strain

This special stock is the finest we have ever seen and we are confident that no better seed can be obtained at any price. It is vigorous, exceptionally uniform and dependable, and ripens medium early. It produces the fine, compact, tightly budded heads of dark blue-green color which the market wants, and the side shoots are good-sized and of equally fine type. **Oz. 50c; ¼ lb. \$1.50; lb. \$5.00; 10 lbs. \$48.50.**

CATSKILL—By far the best obtainable.

FIELD BEANS

Please write for prices on Field Beans or see our general catalog, published in January. We are offering the following varieties: Boston Marrow, Michelite Pea Beans, California Red Kidney and White Kidney.

ITALIAN GREEN SPROUTING

BRUSSELS SPROUTS

1 oz. will produce about 3000 plants.

236 Catskill

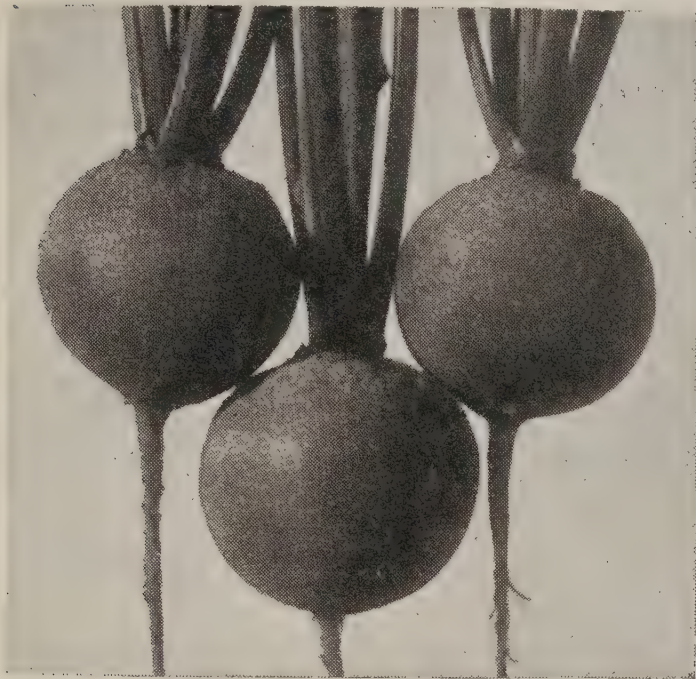

Heavy Yields of The Finest Sprouts

This strain of our introduction is now universally recognized as the best kind to grow in the East—there is simply no comparison with the older kinds. Developed in the Catskill mountain section, where the finest sprouts in the country are grown, it is now used almost exclusively by expert growers there. The plants are very dwarf, compact and uniform, and every one produces a heavy set of large, firm sprouts. Our strain has been carefully selected to maintain the true, high producing type, by far the most productive and dependable to grow.

¼ oz. 90c; ½ oz. \$1.65; 1 oz. \$3.00; ¼ lb. \$10.00; 1 lb. \$35.00.

BEETS

1/4 lb. of seed will sow about 250 ft. of row. Sow 10 lbs. of seed to the acre for rows 14 in. apart; 6 to 8 lbs. per acre for rows 18 in. apart.

HARRIS' DETROIT DARK RED

212 Harris' Special Crosby's Egyptian

Harris' Crosby is without question the best early bunching beet obtainable. It is very early, makes a good strong top and the leaves hold their bright, green color even in cold weather. (It is better than many of the so-called "green top" strains in this respect.)

The beets are very handsome, dark red in color with small tap roots. Recent improvements have made the interior color almost as good as Detroit. The smoothness and uniform shape of this strain make them invariably the finest looking beets in the market, and they naturally command top prices.

We are proud of our stock of this grand beet, for it is backed by over thirty years of careful breeding here on our own farms. As we have said many times, "Every one a model for shape and color." See prices below.

ARASAN is now established as the best seed treatment for beets. It improves stands and protects against damping off. Inexpensive and highly effective. 1 oz. treats 6 lbs. of Beet Seed.

1 oz. 16c; 8 oz. 80c; 4 lbs. \$5.16. Not prepaid.

210 BEETS FOR GREENS. (Green Top)	\$.35			
A distinct, rapid growing variety, selected to produce fine tops quickly.				
212 CROSBY'S EGYPTIAN. Harris' Special Strain. See above40	1.30	12.00	110.00
215 DETROIT DARK RED. Harris' Special Strain. See above40	1.20	11.00	100.00
219 EARLY WONDER. A Superior Strain for Bunching40	1.30	12.00	110.00
Quite similar to our special strain of Crosby's Egyptian. Early and of good deep red color. Our strain of this variety is exceptionally fine.				
222 LONG SEASON. Also called "Winter Keeper"80	2.60	25.00
A very late variety of extra fine quality. Description in Retail Catalog.				

215 Detroit Dark Red Harris' Special Strain

Famous for Fine Color, Good Shape and Big Yields

This is the best beet for late summer and fall trade. It is not only of excellent globe shape but has a superb deep red color that is without equal. Harris' Special Detroit Dark Red is a vigorous large topped strain which is particularly fine for fall bunching, and is also perfectly suited for canners. We know canners who insist on Detroit beets grown from our seed in preference to all others.

We have grown and selected this strain for many years on our farms and now we can confidently state that no better strain of Detroit beet can be obtained. It will produce heavier yields of smooth, round, dark red beets than any other.

Our seed crops again this year have been very good and we offer our customers fine seed of high germination. See prices below.

HARRIS' SPECIAL CROSBY BEETS

	1/4 lb.	1 lb.	10 lb.	100 lb.
210 BEETS FOR GREENS. (Green Top)	\$.35	\$1.10	\$10.00	\$ 90.00

550 MAMMOTH LONG RED. Very Popular30	.80	7.50

CABBAGE

One ounce of seed will produce 1500 to 2000 plants in open ground or about 3000 in frames.

270 Golden Acre

The Earliest Cabbage

This variety is the best early market cabbage and one of the most profitable kinds to grow. The round heads ripen very early in the season and the plants are dwarf and compact with few outer leaves so they may be set close together.

Our seed of this popular variety is the true uniform early strain that we have sold for years and is vastly superior to most stocks sold. See prices below.

GOLDEN ACRE CABBAGE
Grow for early market

YELLOWS RESISTANT CABBAGE

If your farm shows yellows-infected soil, resistant varieties are the only kinds you can safely grow. These resistant strains are now much improved in type and trueness and will produce fine crops. We offer six fine resistant varieties, indicated as "Yellows Resistant" after the name.

271 Golden Acre Special

A Superior Strain for Particular Growers

This finely bred strain of Golden Acre has proved to be the earliest and finest stock obtainable. It is a highly uniform type, ripening a large proportion of its heads at one time, very early in the season. We strongly recommend it to the grower who wants absolutely the best in extra early cabbage. See prices below.

272 Golden Acre, Yellows Resistant

Best Resistant Type for Early Crops.

If you have any yellows on your farm, be sure to plant this early resistant strain. It ripens only a few days after our Golden Acre Special and makes good-sized firm heads of the best type for early market. Our strain is much more uniform and productive than most, and we recommend it highly wherever there is a trace of yellows. See prices below.

281 Marion Market

Yellows Resistant—Copenhagen Type

Great improvement has been made with this stock, and it is now as uniform and true as any of its class. The heads are larger and a little later than our Copenhagen Market and are well adapted for main crop market and for kraut. Our stock produces round, solid heads of the finest type and should be used wherever there is any indication of yellows in your soil, for it will now hold its own with the best non-resistant varieties. See prices below.

291 Round Red Dutch

This is the best type to grow in place of our Red Acre which is not available this year. It is medium early and produces fine, solid, deep red heads, weighing 5 to 6 lbs., round in shape and excellent for market or shipping. The vigorous plants yield well even under adverse conditions. See prices below.

EARLY AND MEDIUM EARLY VARIETIES

	Oz.	¼ lb.	1 lb.	10 lb.
250 COPENHAGEN MARKET.....	\$.50	\$1.50	\$5.00	\$49.00
Larger, a few days later and stands longer than Golden Acre. Widely grown for market and shipping. Our strain produces compact, short stemmed plants and fine round heads of highest quality.				
261 EARLY JERSEY WAKEFIELD. Early Pointed Heads.....	.50	1.35	4.50
A popular extra early variety with small upright pointed heads of excellent quality. Our strain is particularly fine, the heads being very uniform and early.				
263 ENKHUIZEN GLORY. Large Headed Midseason Type.....	.45	1.20	4.00	39.00
Large round, medium early type for market and kraut. Heads as large as the late kinds and mature much earlier. The heavy yields make this a most profitable variety.				
264 ENKHUIZEN GLORY, Yellows Resistant. (Globe).....	.50	1.50	5.00	49.00
A uniform stock of Enkhuizen Glory type for use on yellows infected soil. Heavy yielder.				
270 GOLDEN ACRE. The Earliest Variety. See above.....	.50	1.35	4.50	44.00
271 GOLDEN ACRE SPECIAL. See above.....	.65	2.00	7.00	69.00
272 GOLDEN ACRE, Yellows Resistant. See above.....	.60	1.75	6.00	59.00
276 LARGE LATE COPENHAGEN. Best for kraut.....	.50	1.50	5.00	49.00
Extra large-headed stock and a tremendous yielder, this strain is best for kraut. Heads remain longer without splitting than any other kind, and grow 10 to 12" in diameter. Round and uniform.				
281 MARION MARKET. Yellows Resistant. See above.....	.50	1.50	5.00	49.00
290 RED ACRE.....	Crop Failed.....			
291 ROUND RED DUTCH. See above.....	.75	2.20	7.50

HARRIS' DANISH BALLHEAD—The outstanding short-stem Danish cabbage.

255 Danish Ballhead

Harris' Special Strain

With all confidence, we can say that this is the best strain of Danish cabbage obtainable. A true, short-stemmed Danish type, its heads are rounder than most Danish with an attractive, bright green color, slightly tinged with purple. Uniform and solid, it is just the right size for market and shipping, averaging 5 to 6 pounds, and the handsome appearance makes them easier to sell.

The vigor and great uniformity of this strain make it the most consistently heavy yielder we know and in addition, it has proved to be a superior keeper, holding its green color well and coming out of storage in excellent shape. The seed we offer was grown directly from our latest and finest stock seed, produced here on our farm. If you want the best Danish, grow Harris' Special Strain. See prices below.

285 Penn State Ballhead

More and more cabbage growers each year are turning to our stock of Penn State Ballhead, outstanding for its solid heads and its big tonnage per acre.

The heads are medium size, somewhat flattened and exceptionally uniform. It is an excellent type for storage, a heavy yielder and attractive in appearance, making it a most profitable kind to grow.

The stock seed for our crop came directly from Dr. Myers at Penn State College, and the strain we offer is the best and purest obtainable. See prices below.

All the cabbage seed we offer is **HOT WATER TREATED**, eliminating the possibility of Black-Leg or Black-Rot being carried on the seed. It's more work for us, but it's *protection* for you!

LATE OR MAIN CROP VARIETIES

	Oz.	¼ lb.	1 lb.	10 lb.
242 ALL SEASONS. Yellows Resistant.	\$.50	\$1.35	\$4.50	\$44.00
A large late domestic type producing heavy crops of fine quality cabbage for kraut. Heads broad, semi-flat and very solid. Highly resistant to yellows.				
245 BUGNER. Yellows Resistant.50	1.50	5.00	49.00
This old variety is still a fine late cabbage in many sections. Popular for its resistance to yellows and its big crops. Ripens quite late, with broader and more flattened heads than Danish Ballhead.				
255 DANISH BALLHEAD, Harris' Special Strain. The Best Late Cabbage. See above.55	1.65	5.50	54.00
285 PENN STATE BALLHEAD. True Stock. See above.50	1.50	5.00	49.00
292 SUPER CURLED SAVOY. (Chieftain) The Best Variety.50	1.50	5.00	49.00
Finest Market Gardeners' Strain. Fine heads, more savoyed, earlier and more compact plants than most Savoy. Heads large and solid. This is the most uniform stock we have ever seen.				
295 WISCONSIN HOLLANDER. Yellows Resistant.55	1.65	5.50	54.00
The best "yellows" resistant Danish cabbage obtainable but should be used only where the soil is known to be infected with yellows.				
279 MAMMOTH ROCK RED. Sure Heading Strain.50	1.35	4.50	44.00
The largest red cabbage. The heads are hard, medium round and deep red. This is the best late red kind for market or shipping.				

248 CHINESE CABBAGE—Chihli

This is the best Chinese Cabbage for market and roadside stands. The heads are very attractive, often 18 in. long and 3½ to 4 in. thick at the base, tapering to the tip. They are uniform in shape and size, firm, crisp and of fine quality. A profitable crop, as it commands a ready market, and can also be stored for about two months. Sow the seed in July or August; the crop matures in 8 to 10 weeks. 1 to 1½ lbs. will sow one acre. Oz. 30c; ¼ lb. 80c; 1 lb. \$2.50; 10 lbs. \$23.50.

CAULIFLOWER

One oz. of seed will produce 1500 to 2000 plants in open ground or about 3000 in frames.

SNOWBALL, PERFECTED STRAIN

340 Snowball Cauliflower
or
341 Perfected Strain

The best strain of cauliflower to grow.

This is the stock that it pays to grow! Year after year this strain continues to produce the largest percentage of fine, uniform, number-one heads; the kind that brings top prices. It is recognized by many leading growers in the East as the best cauliflower grown.

The heads are deep and heavy, of uniformly good size, beautifully white with a tight attractive curd. The plants are robust and erect and there is ample leaf coverage around the head.

Growers like its longer harvest period, because the whole crop is rarely lost in a period of bad weather, and they find it unexcelled either for local market or for shipping. The uniformity and dependability of Snowball, Perfected Strain have made it the one outstanding stock in all sections. See prices below.

Imported or Domestic?

Again this year we are offering our customers their choice of American-grown or imported seed of Snowball, Perfected Strain. Many have found that the domestic seed has a little higher germination and greater vigor in the seed-bed, but others prefer our high-quality imported stock.

You will note that this strain is listed under two variety numbers in the price list below, one for American and one for imported seed. In ordering, please specify which you prefer, domestic, 340, or imported, 341.

345 Super Snowball

This is the best strain for extra early crop. Under favorable conditions of soil and weather it produces wonderful yields of fine, large, broad heads, the whole crop maturing at almost the same time.

We are proud that we can again supply this true, original strain of Super Snowball. Although there are many similar strains offered under a wide variety of names, our customers have found that this strain has never been surpassed. See prices below.

343 Snowdrift

Also Called White Mountain and Improved Holland Erfurt

In the same season as Snowball, producing large firm heads which are practically pure white. In our trials this year, this strain was outstanding for even shape and whiteness.

This variety is popular in many sections and is sold under a number of different names. Ours is an extremely fine true stock which has given excellent results for our customers. We recommend it highly. See prices below.

HOT WATER TREATED SEED

All the cauliflower seed we sell is carefully **Hot Water Treated**, according to the recommendations of the N. Y. State College of Agriculture. Experts state that this treatment eliminates seed borne diseases, particularly black-rot and black-leg, and produces cleaner and better crops. You must still be very careful to grow your plants on disease-free soil and to avoid contamination from manure or diseased plant refuse, as any infection in the seed-bed may mean loss in the field.

333 New Early Purple Head

Primarily a home-garden type, this purple cauliflower has such delicate flavor and attractive appearance that it is being used by many growers for roadside stands or local markets. Once known, it brings customers back for more. The heads ripen in September from plants set the last of June and they should not be tied. The bright purple color is a mark of very superior quality. See prices below.

CARROTS

An ounce plants about 300 feet of row. Sow 2 to 4 lbs. per acre, depending on the width of the rows.

305 Chantenay—Special Strain

This is an extra fine strain, growing fully an inch longer than the Red Cored or the old strains of Chantenay and it is being grown more and more each year. It is an all-purpose type, used for bunching and busheling as well as for the canners. The carrots are handsome, smooth and stump-rooted, and the yields are enormous. Tops big and strong. For many years one of our best-selling carrots and we recommend it highly. See prices below.

320 Red Cored Chantenay

Heavy Yielding Type Preferred by Canners

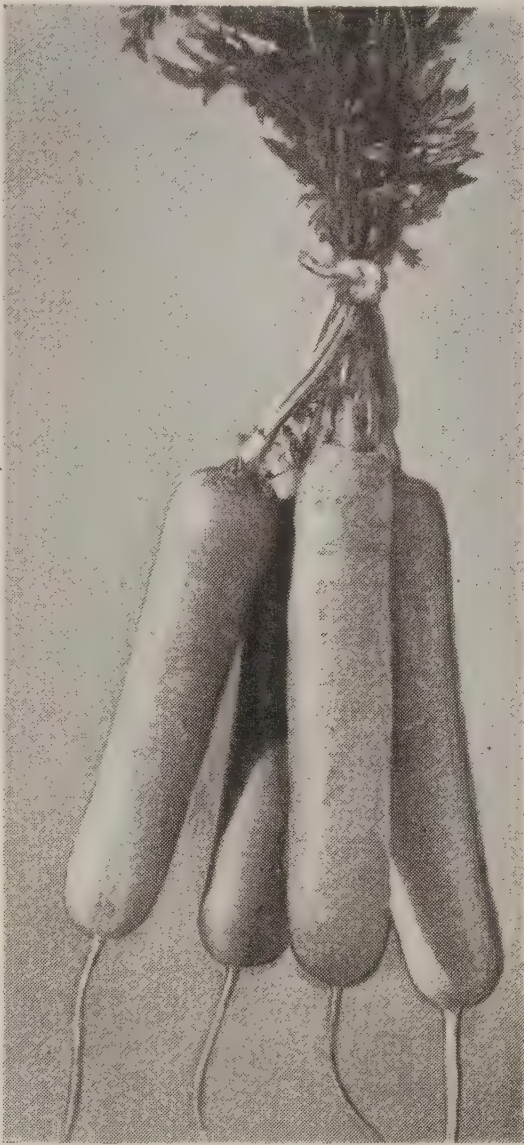

We have an excellent stock of this popular carrot and our customers are highly pleased with it. This stock will produce enormous crops of fine, smooth carrots, and has been so improved in recent years that it is practically 100% red cored. It is used both for market and as a high quality kind for canning. Red Cored Chantenay does remarkably well on muck, making a long smooth root of attractive appearance. See prices below.

315 Nantes—Coreless

Smooth and Handsome—Finest Quality

Nantes is the attractive *coreless* variety that is used so extensively for early bunching and as a topped carrot on many markets. The carrots are six to seven inches long, nearly the same diameter the entire length, and stump rooted. The smooth waxy surface and uniform cylindrical shape give them a most handsome market appearance. They are entirely coreless and of finest quality.

We highly recommend this excellent and popular variety. See prices below.

NANTES CORELESS

316 Nantes—Strong Top Strain

Early Bunch Carrot—Popular for Market

Many growers find this the best strain for bunching. The tops are not noticeably larger than the regular strain, but they are stronger and less likely to break at the collar. The roots are the same excellent type, thick, cylindrical and stump rooted, and the inside color is even better. It is of the true coreless type and for early bunching carrots, this strain is unexcelled. See prices below.

312 Imperator

Outstanding for Bunching

Our strain of this famous bunching carrot is much superior to others in smoothness, uniform slender shape and deep orange color. The carrots are ideal for high class bunching trade, growing about 8 inches long, smooth, somewhat tapering, and the fine dark color is carried right down to the tip. This stock is really *coreless* and of fine quality. The tops are just right for bunching. See prices below.

	Oz.	¼ lb.	1 lb.	10 lb.	100 lb.
305 CHANTENAY. Special Strain—Long. See above.....	\$.20	\$.60	\$2.00	\$19.00	\$180.00

308 Danvers Half Long. A Heavy Cropper.....	.20	.60	2.00	19.00	180.00
We have a pure heavy yielding stock of this popular variety.					
310 HUTCHINSON. True New England Type.....	.25	.75	2.45	23.50	225.00
Produces large carrots 9 to 10 inches long, nearly cylindrical and stump-rooted. Enormous yielder and widely grown in New England and other sections both for bunching and as a topped carrot. Our stock is superior in color and dependability.					
312 IMPERATOR. See above.....	.25	.70	2.20	21.00	200.00
315 NANTES (CORELESS). See above.....	.30	.85	2.75	26.00	250.00
316 NANTES. Strong Top Strain. See above.....	.30	.85	2.75	26.00	250.00
325 TENDERSWEET. The Sweetest Carrot.....	.30	.85	2.75	26.00	250.00
This carrot is being grown more and more for market. The roots are large, smooth and tapering, of striking deep orange-red color. They are a good bunching carrot and are of very superior quality.					

25 lbs. or more of one variety will be supplied at the 100 lb. rate.

CELERY

An ounce of seed will produce about 8000 plants. It requires 20,000 plants to the acre.

CORNELL 19 CELERY

377 Summer Pascal

Early Green Celery of Superior Quality

Because of its earliness, fine quality and attractive appearance, this excellent celery has become very popular in the East wherever green celery is grown. The plant is medium tall, very robust with long, thick, rounded stalks. The stems blanch quickly and are of the finest quality. Summer Pascal is very well adapted for both early and later crops.

Our strain is outstanding for uniformity and produces more heart than most strains. We recommend it as the finest strain obtainable. See prices below.

358 Cornell 19 Celery

Developed by Cornell University, this fine variety has rapidly become one of the most popular in the East, both for muck and upland.

It is a yellow self-blanching type combining all the best qualities of the green Pascal celeries—the stalks are very long, smooth-ribbed and deeply rounded, and the flesh is thick, crisp and tender. The heart is well developed and *even the outer stalks are of excellent quality.*

It is resistant to yellows and the growth is vigorous and healthy, producing very large yields. We recommend it especially for main crop as it may produce seeders if the plants are subjected to cold temperatures for several days. The stalks blanch quickly and hold up well in storage. See prices below.

357 Cornell 6

Extra Thick Stalks—Beautiful Appearance

We are glad that we can again offer this vigorous-growing celery of the same type as Cornell 19. It makes a somewhat heavier growth, the stalks are thicker and smoother and it shows a little fuller heart. Not quite as long to the first joint but the broad smooth stalks have a waxy sheen and a most attractive creamy yellow color.

Like Cornell 19, the quality is excellent but the stalks are brittle and require care in handling. Highly recommended. See prices below.

365 Golden Plume or Wonderful

Original Strain

This is our original type of Golden Plume which has proved so satisfactory to our customers. The stalks are very large with remarkably heavy hearts and thick, solid stems. Crops which pack 4 doz. to a standard $\frac{2}{3}$ crate are not at all uncommon.

Many of the best celery growers in the country get their Golden Plume seed from us. They find that they can get best results without having to pay a fancy price for their seed. See prices below.

Green Varieties

363 GIANT PASCAL. Special Strain. (Late.).....		.40	.75	2.35	8.00
Tall late green celery of good quality; one of the best for late winter market. The stalks are large, solid and blanch pure white.					
375 SALT LAKE or UTAH. The Favorite Green Celery.....	.35	.55	1.00	3.40	12.00
One of the finest kinds for fall crop and storage. The stalks are very thick, crisp and of highest quality, and the hearts are heavy and well developed. We have a fine uniform stock producing practically no soft stalks, and growers are always very enthusiastic in its praise.					
377 SUMMER PASCAL. See above.....	.40	.65	1.25	4.25	15.00

CELERIAC—Turnip-Rooted or "Knob" Celery

350 DELICACY. Grown for superior quality. Delicious medium-sized bulbs, maturing early.
 $\frac{1}{2}$ Oz. 40c; Oz. 75c; $\frac{1}{4}$ lb. \$2.35; lb. \$8.00.

352 LARGE SMOOTH PRAGUE. This is the standard market garden variety, producing good size bulbs of the finest type.
Oz. 60c; $\frac{1}{4}$ lb. \$1.75; lb. \$6.00.

SWEET CORN

One pound of seed will plant 350 to 400 hills; 10 to 12 lbs. will plant an acre.

NOW—ALL OUR SWEET CORN SEED IS TREATED

an added service to give you better stands and bigger crops.

Northern-grown sweet corn seed has been our specialty for many years. Combining scientific breeding with the greatest care in processing, we produce seed of the highest vitality and purity.

Our trial work means better sweet corn for you.

Our sweet corn trials and "workshop" are the scene of many disappointments. Of the hundreds of experimental crosses we make every year, only a few will have enough promise to make it worth while to continue their development, and as often as not the second year will show that these too have little value for the grower.

But although really great new varieties are created only at long intervals, the work of improving our established varieties goes on all the time. By constant selection of their parent inbreds and further experimental crossing, we can give you frequent advances in their earliness, size or quality.

And when the new varieties we are now developing appear in quantity, they too will be kept up to the increasingly higher standards we set ourselves that make Harris' Sweet Corn the best to be had.

130 North Star

Extra Early—Large Ears—Fine Quality (67 days)

This Harris' hybrid introduced by us in 1941 has become one of the most widely grown early varieties in the East. It ripens only a few days after Seneca 60 yet has the same fine large ears as many later varieties, and growers everywhere praise it in glowing terms. They like its rapid and vigorous growth, the enormous yield and the large delicious ears.

The kernels are deep, creamy gold and exceptionally tender and sweet. Ears are fully 7 inches long, mostly 12 rowed, and well protected by a fine large husk which makes them most attractive. The ears sell at a premium on sight, and the wonderful flavor and tenderness brings the customers back for more.

North Star is by far the finest corn for first early crop. Growers tell us that the vigorous seed will come up even in cold weather when other varieties fail to make a stand, and it ripens early, bringing the highest prices. The yields are also much greater than other early kinds and many growers use North Star even for later plantings. See prices on page 13.

125 Marcross C6.13

Early—Uniform Large Ears, Wilt Resistant (69 days)

Popular early hybrid ripening a day or two later than North Star and noted for its remarkably uniform large ears. The stalks are short and sturdy and the ears are 12 rowed, about 7 inches long with light golden yellow kernels of very good quality. The strain we offer is a most uniform and attractive stock, and we recommend it highly.

Completely resistant to wilt (Stewart's Disease). See prices on page 13.

NORTH STAR

"Every ear of North Star was in the market before any other local corn was in."

Fred Perley, Vassalboro, Maine., Feb. 12, 1947

CARMELCROSS, IMPROVED

Every ear is large, attractive and delicious

124 Lincoln

Drought Tolerant—Large Ears (81 days)

Lincoln, developed by the Connecticut Experiment Station, has won an important place in many sections because of its tall sturdy plants and its ability to stand drought and adverse conditions. The plants grow 7 to 8 feet tall with very stiff stalks and practically no suckers. It is resistant to wilt.

The ears are ready 3 to 4 days earlier than Golden Cross and are very large, measuring 7-8 inches. They are cylindrical, very uniform and have 12 to 16 rows of deep narrow kernels. See prices on next page.

115 Golden Cross Bantam

The Best Main Crop Hybrid—Biggest Yields—Best Quality (84 days)

One of the first hybrid sweet corns to be developed, Golden Cross Bantam is still by far the best main crop type for both market and canning. Our strain has been so much improved in recent years that the seed we now offer is as close to perfection as anything we have ever seen. Widespread tests and the reports of growers in all sections prove that this stock is better than all others in yield, uniformity, quality and size of ear.

The tall vigorous plants produce heavy crops ripening nearly all at one time. The ears are large (about 8 in.) and remarkably uniform in size and type. They have 12 to 14 rows of bright golden yellow kernels of supreme quality. Our stock of Golden Cross holds its tenderness and flavor better than other kinds and the handsome appearance of the ears has never been surpassed.

This variety is resistant to wilt and widely adapted all over the country. *For best results sow not more than six pounds per acre.* See prices on next page.

123 Ioana

Large Eared—Midseason—Wilt Resistant (86 days)

This outstanding hybrid has been welcomed by sweet corn growers as an exceptionally dependable large eared variety for main crop. The ears are large, slightly tapering, mostly 8 to 9 inches long with 12 to 14 rows (a few 16) of creamy yellow, medium deep kernels, which fill the ear well at the tip.

These large attractive ears are of good quality, being sweet and tender. The plants are tall and strong, with few suckers, and they seem to stand drought remarkably well. In some sections where large crops of sweet corn are grown for market, some of our customers prefer it even to Golden Cross Bantam. See prices on next page.

SWEET CORN—Continued

107 Carmelcross, Improved

The Largest and Finest Second Early Corn (72 days)

For market, our Carmelcross Improved is now tops in its class. Ten days ahead of the main crop market varieties, it equals them in size of ear, high quality and big yields. It is the ideal corn to follow North Star and many growers use it all through the season.

The husky vigorous plants are resistant to wilt and productive under nearly all conditions. The big well-filled ears have 12 to 16 rows of bright yellow kernels protected by a tight heavy husk, and the quality is excellent.

Our Improved Strain has bigger, more uniform ears and is by far the best type. If you haven't tried Carmelcross, grow some this year. See prices on next page.

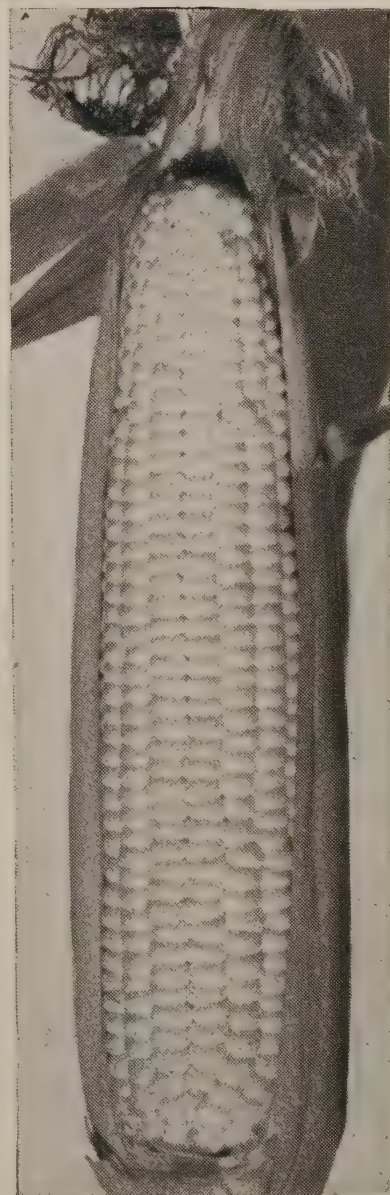

132 Northern Cross

An Early, Heavy-Yielding Hybrid (73 days)

This vigorous Harris' Hybrid has been a favorite for many years. It makes a rapid, husky growth and there are usually two good ears on each plant. Northern Cross ripens just after the very early kinds, and the ears are good sized (7-8 in.), very uniform, with 12-14 rows of bright yellow kernels. The quality is excellent. *Caution:* Northern Cross is not resistant to Stewart's Disease (wilt). See prices on next page.

LINCOLN

Good-looking, well filled ears

111 Golden Bounty (New)

New Larger Golden Cross Type (85 days)

For many years we have tested and discarded dozens of hybrids similar to Golden Cross Bantam, but we never found one that would rival our regular strain. This one, however, appears to be worthy of introduction to our customers, and we suggest that you try it out on your farm. With us, it grows taller, with broader leaves and a huskier plant than the regular, and carries the ears higher. It has a definitely longer and slightly larger ear, perhaps not quite as perfect an arrangement of kernels, but very good-looking and the true Golden Cross type, and it has the same wonderful flavor and sweetness. It ripens at the same time and yields just about as many ears. See prices below.

120 Harris' Extra Early Bantam

Heavy Yielding—Very Early (68 days)

One of the few open-pollinated varieties still in good demand. It is among the earliest to ripen and produces big yields, often maturing before the large eared hybrids begin to flood the markets. The ears resemble true 8-rowed Golden Bantam in size, shape and high quality, but are ready 10 days earlier. Our seed, grown here in Monroe County, retains all the vigor, earliness and yield of this popular kind. See prices below.

141 Whipple's Yellow

Harris Original Northern Grown Strain (77 days)

Another famous open-pollinated corn, introduced by us in 1920, and still planted to a large extent. Our strain has been bred for earliness, uniformity of size and high yield, and our Northern grown seed continues to surpass all other strains offered. The ears are large, with 12 to 16 or more rows of fine kernels. See prices below.

GOLDEN CROSS BANTAM

A new early hybrid—produces heavy crops of small ears. It is a white hulless type with exceptional popping quality and fine flavor.						

*Purchaser pays shipping charges on sweet corn and pop corn except as follows: If your order for vegetable seeds, including corn, amounts to \$20.00 or more we will prepay the freight charges. See also inside front cover.

CUCUMBERS

$\frac{1}{4}$ lb. of seed will plant about 300 hills or 200 ft. of row.
It requires about 2 lbs. per acre in hills or 3 to 4 lbs. drilled.

MARKETER—Joe Harris checks the big yield from 10 hills in our trials.

400 A & C Cucumber

The Leading Variety for Market

The long slender shape and handsome dark green color have made this one of the most popular cucumbers grown today. They are very deep green over the entire fruit, with only indistinct blossom end rays, and they hold their color well.

The cucumbers are 8 to 9 inches long, beautifully proportioned, smooth and dark green, and make a very fancy pack. The vines are healthy and produce large crops of the finest fruit. Our strain is outstanding for uniformly fine shape and color, and we recommend it highly. See prices on next page.

"Last year (my first year as a farmer) I planted A & C cucumber seed. On the market my cukes sold at a premium while others were returning home with their kind."

John H. Richards, Bay City, Mich., Jan. 17, 1947

418 Harris' Double Yield

Early—The Best for Pickles

This is the kind to grow for pickles. More growers every year plant our famous Double Yield, now improved in type and yield by selection and breeding here on our farms.

The small cucumbers are very straight with blunt ends, smooth, cylindrical and medium deep green in color. They are ideal for small pickles and the fine shape is carried on all sizes of fruit. (See photo.)

If the pickles are kept picked off, the vines produce astonishing crops. Young cucumbers are often produced in clusters of 3 or 4 like the fingers of your hand.

This is also the earliest variety we know and many growers use it for early slicers; it matures to slicing size two weeks earlier than other kinds. See prices on next page.

430 Marketer

New Extra Fancy, Dark Green Slicing Type

A very vigorous and prolific streamlined cucumber that is rapidly becoming the leading variety for slicing in the East. The smooth slender fruits are remarkably uniform and trim in appearance, and have the darkest green color of any variety, extending all the way down to the blossom end. They average 7 to 8 inches long, straight and slightly tapered at the ends, and the flesh is very thick with a small seed cavity.

The vines hold up well and give tremendous yields of these slim, elegant deep green fruit. One great advantage is that the fruit on the late pickings is just the same excellent type as on the first picking. If you want extra fancy slicers for market, grow Marketer. See prices on next page.

438 Straight Eight

An Early Prolific Long White Spine

Has become very popular among growers because of the large early yield of fine straight cucumbers. Straight Eight produces heavy crops at a time when the other kinds are only just beginning to bear. The vines continue to produce heavily throughout the season.

When ready for market the cucumbers are 8 to 9 inches long, straight, smooth and blunt ended. The color is medium green with green rays at the blossom end. We can recommend Straight Eight for a money making crop. See prices on next page.

Use Copper Spray (C-O-C-S) to control mildew and other diseases on cucumbers. See page 48.

HARRIS' DOUBLE YIELD PICKLES
Abundant yields, uniform fruit

CUCUMBERS—Continued

425 Irondequoit Hothouse Cucumber—Greenhouse Grown Seed

This is the famous variety which has been developed by the greenhouse growers around Rochester. The seed has been saved for us from perfect fruit grown under glass by an expert cucumber grower in Irondequoit, and will produce remarkably fine uniform cucumbers. The fruit is long, slender, and deep green, almost entirely solid, having very few seeds. The vines are vigorous and very prolific. 100 seeds 75c; 250 seeds \$1.75; 500 seeds \$3.25; 1000 seeds \$5.50.

	Oz.	¼ lb.	lb.	10 lb.	100 lb.

J. L. Snyder, Connelsville, Pa., Jan. 30, 1947

CHICORY—French Endive

- 386 WITLOOF CHICORY. Special Forcing Strain.
An exceptionally fine strain, especially selected to produce the highest percentage of perfect heads when forced.
Oz. 50c; ¼ lb. \$1.50; lb. \$5.00.

CRESS

- 396 EXTRA FINE CURLED, also called Pepper Grass.
A hardy quick growing annual, producing an abundance of finely curled dark green leaves. True Stock.
Oz. 15c; ¼ lb. 35c; lb. \$1.00.
- 398 WATERCRESS, Improved Broad Leaved.
A much better strain than the common wild Water Cress. Excellent for forcing in greenhouses and cold frames.
½ oz. 55c; oz. \$1.00; ¼ lb. \$3.40; lb. \$12.00.

DILL

- 458 LONG ISLAND MAMMOTH.
Is much superior to the common dill, being larger and more productive.
Oz. 15c; ¼ lb. 35c; lb. \$1.10; 10 lbs. \$10.50.

CORN SALAD

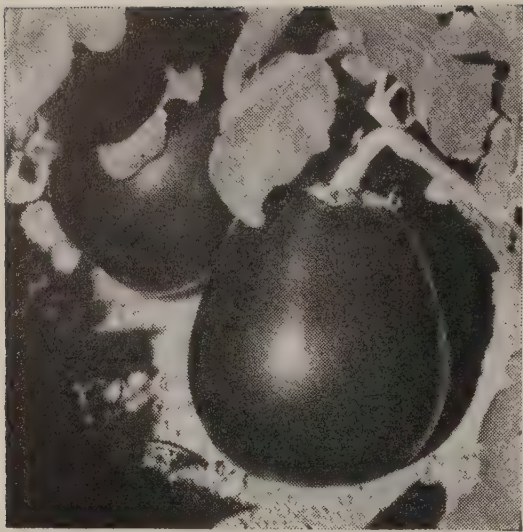

- 393 LARGE ROUND-LEAVED. Market Gardeners' Dark Green Strain.
The leaves are uniformly large and dark green. Finest quality imported seed now available.
Oz. 35c; ¼ lb. 95c; 1 lb. \$3.00; 10 lbs. \$29.00.

COLLARDS

- 390 GEORGIA.
Large cabbage-like leaves, which grow loosely on stems 2½-3 feet tall. Does not form heads. May be sown in spring and transplanted like cabbage or drilled in June or July. Popular in the South for table use and stock feeding.
Oz. 15c; ¼ lb. 35c; lb. \$1.00; 10 lbs. \$9.00.

DANDELION

- 452 ITALIAN DANDELION. (Cicoria Catalogna).
Large dark green dandelion-like leaves, which are cut several times during the season for "greens." Ours is the true stock.
Oz. 45c; ¼ lb. \$1.30; lb. \$4.00; 10 lbs. \$35.00.
- 453 LARGE THICK LEAF.
No seed available.

BLACK BEAUTY

EGG PLANT

An ounce of seed will produce about 2000 plants.

461 Black Beauty

True and Prolific Strain

We can strongly recommend this stock as it is the finest strain of Black Beauty that we have ever seen. The plants are sturdy and vigorous, producing an abundance of uniformly large handsome dark purple fruit even here in the North. See prices below.

	Oz.	¼ lb.	lb.
461 BLACK BEAUTY. See above.....	\$.60	\$1.90	\$6.50
463 EARLY LONG PURPLE.....	.75	2.35	8.00
Fruit 6 to 8 in. long, not over 2 to 3 in. through. Early and very prolific, dark purple.			

465 NEW HAMPSHIRE HYBRID. Extra Early and Prolific.....	\$.75	\$2.35	\$8.00
Very early and especially valuable for growers who have difficulty producing egg plant profitably in the North. The medium size fruits are oval in shape and borne in great abundance on dwarf plants.			

ENDIVE

An ounce of seed will sow about 100 feet of row; 2 to 2½ lbs. per acre.

	Oz.	¼ lb.	lb.
471 DEEP HEART FRINGED. Broad fringed leaves.....	\$.25	\$.65	\$2.00
An entirely distinct type, recently introduced and very popular. Large and robust plants with broad fringed leaves and upright growth. Produces a fine deep heart when fully grown.			
478 GREEN CURLED PANCALIER. Best for Late Market. Pink Ribbed.....	.25	.65	2.00
The leaves are not so finely cut as the Green Curled. Has fuller, heavier hearts. A favorite of market gardeners. This variety does best on rich soil.			
477 GREEN CURLED. Also called "Chicory." Green ribbed.....	.25	.65	2.00
Leaves finely cut and curled. Exceptionally uniform with a fine heavy heart.			
473 FULL HEART BATAVIAN (Escarolle). True Dark Green Strain.....	.25	.65	2.00
Our strain of this variety produces heads which are tightly packed with broad dark green leaves. The full hearts blanch to a beautiful golden color.			

French Endive—Witloof Chicory—See under Chicory on page 15.

FENNEL

- 481 FLORENCE.
The standard variety and very reliable.
Oz. 25c; ¼ lb. 75c; lb. \$2.25.
- 482 MAMMOTH.
This strain grows extra large bulbs, rounder and thicker in shape than the regular kind and is therefore superior
Oz. 30c; ¼ lb. 85c; lb. \$2.75.

GARLIC

Separate the bulbs into flakes or "cloves" and set out like onion sets. Bulbs for planting:
Lb. 60c; 5 lbs. or more at 55c per lb. postpaid.

KALE

One pound of seed will sow about one acre.

- 487 DWARF CURLED or Blue Scotch.
We have a very superior strain, absolutely uniform, with very fine curled leaves and the much desired deep bluish green color. Plants of dwarf habit, vigorous with large leaves. ¼ lb. 90c; 1 lb. \$2.75; 10 lbs. \$26.50.
- 489 SIBERIAN. Also called "Early Sprouts."
Plants very large and spreading, leaves broad and thick, curled only at the edges. Color blue green. Very hardy and used largely for wintering over.
¼ lb. 60c; 1 lb. \$2.00; 10 lbs. \$19.00.

HERBS for Flavoring, Etc.

	Oz.	¼ lb.	lb.
931 BASIL. Large Leaved... \$.45	\$1.30	\$4.00
933 BORAGE.....	.35	1.00	3.00
458 DILL. See page 15.....	.15	.35	1.10
939 LAVENDER.....	2.50
943 SAGE. Broad Leaved...	.70	2.10	7.00
945 SUMMER SAVORY.....	.50	1.40	4.50
947 SWEET MARJORAM...	.55	1.65	5.50

KOHL RABI

An ounce of seed will sow about 200 feet of row.

- 492 EARLY WHITE VIENNA.
Round white bulbs, early. A very uniform stock, which we recommend most highly.
Oz. 35c; ¼ lb. \$1.10; lb. \$3.50.
- 493 EARLY SHORT-LEAF FORCING.
Adapted for forcing under glass and for extra early crops outdoors. Tops very short.
Oz. 60c; ¼ lb. \$1.75; lb. \$6.00.

LEEK

An ounce of seed will sow about 200 feet of row.

- 497 ELEPHANT. Large Thick Stalks.
The best kind for market and a great improvement over the old varieties. Stalks extra large and sturdy, smooth and clear pearly white.
Oz. 50c; ¼ lb. \$1.50; lb. \$5.00.

LETTUCE

An ounce of seed will sow 250 feet of row; about 2 lbs. per acre.

520 Great Lakes

Tipburn Resistant—Best Iceberg Type for Summer Growing

Great Lakes has become almost overnight the leading Iceberg lettuce for the East, because it consistently produces fine, clean, hard heads, even in the hot weather of midsummer. It is highly resistant to tipburn, heads nearly 100% under a wide range of conditions and stands without bolting longer than any other kind.

The plants are large and vigorous, and the heads are of good size and attractive deep green color. They have heavy ribs and crisp thick leaves that fold well over to make very solid hard heads. Planted in the spring, they are ready to cut about a week later than Imperial 44 and will remain in condition a long time thereafter.

Great Lakes is best adapted for upland growing. See prices below.

CORNELL 456

Fine for muck and upland—tipburn resistant.

508 Cornell 456

Developed by Cornell University, this tipburn resistant variety has already proved the one outstanding lettuce to grow on muck, and is also excellent for upland in many sections. It is a hard-heading Iceberg type like Great Lakes and stands adverse conditions, such as hot weather, just as well. The solid compact heads develop evenly to about the size of Imperial 44 and are ready almost as early.

Cornell 456 is a real gain for lettuce growers, especially for summer crops. See prices below.

525 Imperial 44

High Quality Iceberg for Spring or Fall Crop

For early spring and fall crops, Imperial 44 is still a good Iceberg type to grow in the East, both on muck and upland. It has some resistance to tipburn and produces lettuce of high quality that will compete successfully with western grown Iceberg.

The heads are large, well formed and solid and practically every plant makes a fine head. See prices below.

	Oz.	¼ lb.	lb.	10 lb.
504 BLACK SEEDED SIMPSON.	\$.20	\$.55	\$1.75	\$16.50
Widely grown loose leaf type. Broad light green leaves.				
507 Chicken.15	.45	1.50	12.50
508 CORNELL 456. See above.50	1.35	4.50	42.50
517 GRAND RAPIDS. The Most Popular Loose Leaf Type.20	.65	2.00	19.00
Excellent for outdoor as well as greenhouse growing and is used by the most critical growers. The leaves are light green, uniformly well curled.				
518 GRAND RAPIDS U. S. No. 125	.75	2.25	21.50
A distinct well curled strain, preferred by many growers for greenhouse use.				
520 GREAT LAKES. See above.50	1.35	4.50	42.50
525 IMPERIAL 44. See above.35	.95	3.00	29.00
526 IMPERIAL 847.35	.95	3.00	29.00
Known for its ability to produce fine solid heads of "Iceberg" type. Heads larger than Imperial 44 and a little later. Popular with many growers.				
530 May King. For Frame Forcing.25	.75	2.50	24.00
539 SLOBOLT. (New.) Long-Standing Grand Rapids type50	1.35	4.50
Stands without bolting longer than other loose-leaf types and produces thick clusters of curly leaves. Not well adapted for greenhouse growing.				
542 WHITE BOSTON. Special Strain20	.65	2.00	19.00
There is no better strain than ours. Large headed and so uniform that there is practically no waste in cutting the crop. A very dependable producer.				

Cos or Romaine Lettuce

540 TRIANON SELF-FOLDING.20	.65	2.00	19.00
The most popular variety, making large long heads of fine quality and attractive appearance. Used for forcing under glass and outdoor culture.				
514 DARK GREEN COS.20	.65	2.00	19.00
Same upright, self-folding type as Trianon, but not quite so tall, and leaves are darker green. Cylindrical, solid heads. Good for fall planting, as it stands frost well.				

MUSKMELONS or Cantaloupes

An ounce of seed will plant about 50 hills; 2½ to 3 lbs. per acre.

Growing seed of early, highly productive and fine quality muskmelons for northern Market Gardeners has been one of our specialties for over twenty-five years. Our special strains, developed and selected here on our own farms, are now considered the standard of excellence. You can be sure that these are the best muskmelons for the North.

DELICIOUS MELON

A success on the early market.

570 Market King

Perfect Flavor—Best for Shipping

These medium-sized melons are most remarkable for their uniform sweetness and high flavor. They grow very evenly, with a heavy netting and they have an attractive oval shape without deep ribs. The flesh is very thick with a small seed cavity, deep orange in color and of fine texture. Skin color is blue-grey, ripening to deep yellow.

The healthy, vigorous vines produce enormous yields, ripening a little later than Bender's. See prices on next page.

558 Bender's Surprise

Harris' Special Strain—Large, Fine Melons

This is still the leading large melon for the East, and our strain has no equal for combined large size, attractive appearance, fine flavor and long keeping qualities.

We have bred and grown this stock for over twenty years here on our own farm, always paying special attention to high quality, earliness and trueness to type. This careful selection has made ours the one outstanding stock of this famous variety. If you want the finest *big* melons, grow our Bender's Surprise. See prices on next page.

HOTENTS—For Melons

Grow *earlier* and *better* melon crops with these large, strong field forcers. Economical and practical. Used by leading growers everywhere to protect plants from wind, frosts, insects and beating rains. See inside Back Cover.

560 Delicious

The Largest and Best Early Melon

One of the most profitable melons to grow for local market and roadside stands because of its earliness. With our strain you can get fine good-sized melons almost two weeks before Bender's and thus get highest prices. The melons are moderately ribbed and well netted, and the flesh is quite thick for such an early variety. The vines make a good vigorous growth and produce tremendous yields.

They will not stand long distance shipping but the remarkable sweetness and flavor of the melons grown from our strain makes them ideal for early crop on nearby markets. See prices on next page.

569 Iroquois (New)

High Quality—Resistant to Fusarium Wilt

Originally developed to meet the need for a Bender-type melon with resistance to fusarium wilt, Iroquois has quickly won wide approval for its uniformly excellent quality. It is still the only kind to plant on infected soil and it also has a real place with all growers who want medium-large melons.

The fruits are round to oval in shape with prominent ribs and good netting; the rind is tough and holds up well. The fine textured, thick flesh is deep orange in color and has consistently high flavor and unusual sweetness. Iroquois ripens about in season with Bender's and the vigorous vines are very prolific. See prices on next page.

IROQUOIS MELON

Thick flesh and fine flavor.

MUSKMELONS—Continued

	Oz.	¼ lb.	lb.	10 lb.
558 BENDER'S SURPRISE. Harris' Special Strain. See preceding page.	\$.40	\$1.20	\$3.50	\$32.50
560 DELICIOUS. The Earliest Large Melon. See preceding page.40	1.20	3.50	32.50
566 Hearts of Gold (Large strain.)25	.75	2.50	22.50
A fine melon for shipping, medium in size, round and well netted. Flesh thick, orange yellow, of uniformly excellent flavor. Our stock is the large strain of this well known variety.				
568 HONEY ROCK or SUGAR ROCK.25	.75	2.50	22.50
We have a fine stock of this popular melon which is widely grown in many sections because of its attractive appearance, fine flavor and ability to stand handling. The melons are nearly round, about 5" in diameter.				
569 IROQUOIS. (New.) Resistant Medium Size Bender Type. See preceding page.45	1.30	4.00	37.50
570 MARKET KING. See preceding page.40	1.20	3.50	32.50
572 QUEEN OF COLORADO or Pride of Wisconsin.35	.95	3.00	27.50
Similar to A & C, Jersey Gold, etc. Fruit medium size, oval shape with shallow ribs and good netting. Flesh thick and fine flavored. This is a true, heavy yielding stock which we recommend highly.				

WATERMELONS

An ounce of seed will plant about 25 hills; 2 to 3 pounds to the acre.

582 Honey Cream

Fine for the North—Very Sweet—Yellow Flesh

An extra early variety of the highest quality having distinctive yellow or cream colored flesh. Fruit medium sized, nearly round and attractively striped like Dixie Queen. Not a shipping type but on roadside stands its excellent sweetness and fine flavor will bring customers back again and again; the yellow flesh gives them assurance of fine quality. Ripens as early as a Bender melon and the yields in Northern sections are excellent. See prices below.

	Oz.	¼ lb.	lb.	10 lb.
581 DIXIE QUEEN. The most popular variety.	\$.25	\$.75	\$2.25	\$21.50
Early and very productive. Skin light green with darker stripes. Flesh deep pink, of fine quality. Stands up well for shipping and an excellent kind for local market. True stock.				
582 HONEY CREAM. See above.45	1.30	4.00	37.50
585 STONE MOUNTAIN.25	.60	1.90	17.50
Large, oval somewhat flattened ends. Fine quality and prolific.				
588 WINTER QUEEN. White Skin—Long Keeper.15	.45	1.50	14.00
591 WONDER MELON.15	.45	1.50	14.00
The largest and best of the oblong varieties for growing in the North. They are early, dark green with bright red flesh of fine quality. Will produce large crops even when the seasons are short.				
580 GREEN CITRON or Colorado Preserving.15	.40	1.25	11.50
Not a true watermelon, outer flesh is used in preserving. Very prolific. Green seeded.				

MUSHROOM SPAWN

Full directions for growing are sent with each order of spawn.

TOBACCO PROCESS SPAWN. The finest pure culture spawn, prepared by a new patent process using dried and crumbled tobacco stems. This new spawn is easier to handle, goes farther in planting and helps in repelling insects. It is highly recommended by leading mushroom growers. ½ lb. will spawn 35 sq. ft. of bed. ½ lb. \$1.35; 1 lb. \$2.50; 5 lbs. \$11.50 postpaid. Write for quotations on larger quantities.

MUSTARD

An ounce of seed will sow about 300 feet of row.

	Oz.	¼ lb.	lb.	10 lb.
594 FORDHOOK FANCY. (Long Standing)	\$.20	\$.55	\$1.65	\$15.00
Leaves are slightly smaller and more finely cut and curled than the Southern Curled. A very pure stock.				
595 LONG STANDING. (Southern Curled)15	.45	1.50	14.00
Will stand for a long time without bolting to seed. During the hottest part of the summer this variety has stood for three weeks after it was large enough to cut, without going to seed. The leaves are a medium dark green with beautiful, finely curled edges.				

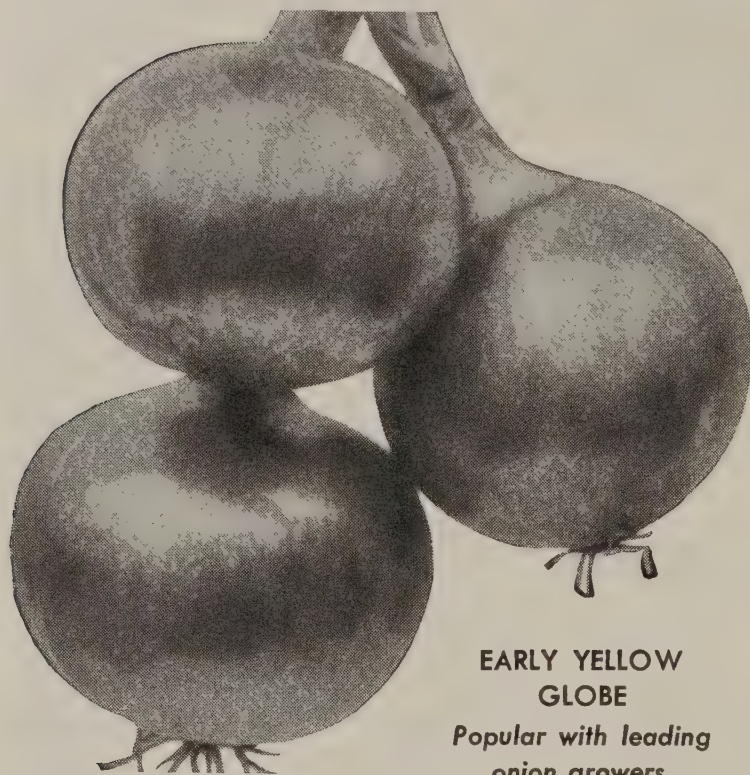

OKRA or Gumbo

An ounce of seed will sow about 50 feet of row.

597 PERKINS' LONG-POD. The Standard Market Variety. Large green pods. Ours is a true uniform stock. Oz. 15c; ¼ lb. 35c; 1 lb. \$1.00; 10 lbs. \$9.00.

ONIONS

An ounce of seed will sow 125 feet of row. It requires 5 to 6 lbs. of seed per acre.

**EARLY YELLOW
GLOBE**

*Popular with leading
onion growers.*

607 Ebenezer

This is the Kind to Grow for Sets

No yellow onion is better adapted to the growing of sets than this fine old variety. When ripe dry onions are wanted to meet the early season market demand, Ebenezer grown from sets, with its remarkably fine quality and attractive appearance, will often bring premium prices.

Ebenezer is flattened in shape with a good yellow color. It is wonderfully firm and solid and an excellent keeper, holding well in storage all winter. For the most successful crops it is important to get the true Ebenezer, and we have it. See prices on next page.

We offer the finest onion sets obtainable, clean and uniform. See prices and varieties under **ONION SETS** on next page.

620 Sweet Spanish—Utah Strain

Large Mild Sweet Onions of Finest Quality

This fine large onion can be grown almost anywhere in the East and is becoming more popular each year. It is an excellent variety both for upland and muck. The onions are large and handsome, often weighing a pound or more, and are fine keepers.

They require a little more time than the early varieties but are vigorous, hardy growers, withstanding adverse growing conditions better than any other kind we know. They are also definitely resistant to injury by thrips.

Our strain is particularly fine for uniformity of shape, small necks and consistently high yields. It produces big deep globe shape onions with a heavy golden brown skin, and the flesh is white, sweet and very mild. We highly recommend this stock. See prices on next page.

605 Early Yellow Globe

The Best Early Yellow Onion

Earliness, enormous crops, fine appearance and unusually good handling and keeping qualities have made this variety the leading early onion both for upland and muck. It is now by far the most widely planted variety in the east.

The onions mature two weeks before Brigham Yellow Globe, are nearly globe shaped, deep yellow in color and with a good skin. They keep well and they yield big crops under a wide range of conditions. Year after year, Early Yellow Globe produces the largest crops of fine onions.

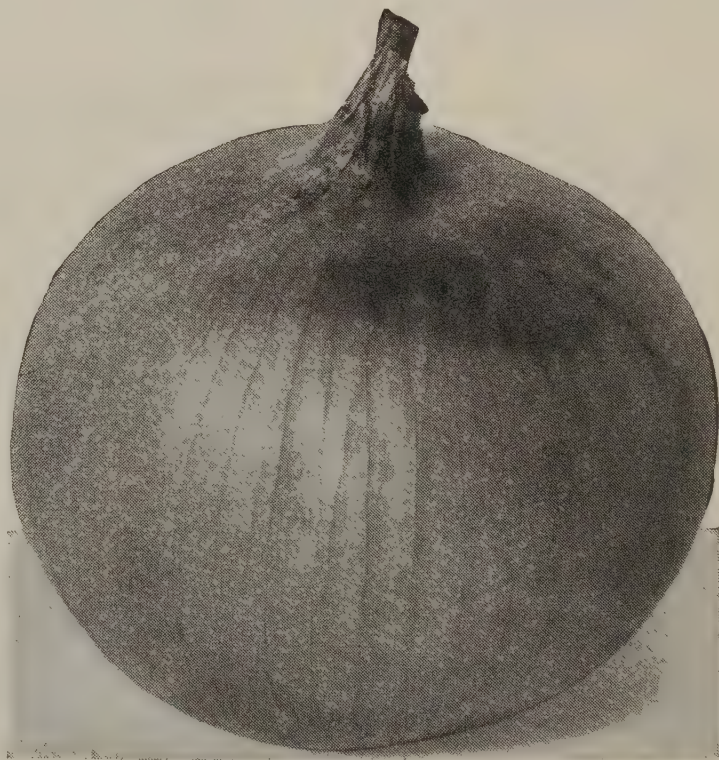

Again this year we are pleased to offer our customers the same fine stock of Early Yellow Globe which has been so satisfactory for the past ten years. See prices on next page.

600 Brigham Yellow Globe

Also called "Michigan Onion" and "Michigan Strain"—The Best Variety for Storage

This remarkable onion together with Early Yellow Globe has practically taken the place of all other kinds in the East and Middle West. It is not only grown extensively on muck but is also a very popular upland variety. It is outstanding because of the large yields obtained, the fine rich golden color together with a heavy thick skin which makes it the best variety for storage.

The seed we offer is of the *true Brigham Strain*, deep globe in shape and even more uniform for type and size than it was when first introduced. See prices on next page.

SWEET SPANISH—Utah Strain

Easily grown from seed and also used for our Texas onion plants which have been highly successful. See ONION PLANTS on next page.

ONIONS—Continued

	Oz.	¼ lb.	lb.	10 lb.	100 lb.
600 BRIGHAM YELLOW GLOBE. Also called "Michigan Onion." <i>See preceding page.</i>	\$.40	\$1.20	\$4.00	\$38.50	\$375.00

610 JAPANESE BUNCHING. Large straight onions. Makes 3 to 5 large straight mild white onions to a plant, is a rapid grower and produces marketable "bunch" onions very early. When fully grown, the onions are nearly an inch in diameter.	.50	1.50	5.00	49.00
616 SOUTHPORT RED GLOBE. The Best Red Onion. Large, perfectly round, deep red onion; keeps well.	.45	1.25	4.25	41.50
617 SOUTHPORT WHITE GLOBE. The Finest White. Large globe shaped white onion. A very profitable variety for experienced growers as it always commands the highest prices.	.55	1.65	5.50	53.00	500.00
620 SWEET SPANISH—Utah Strain. <i>See preceding page.</i>	.55	1.65	5.50	53.00	500.00
624 WHITE BUNCH or White Lisbon. Popular in many markets as an early bunching onion. Forms mild, sweet "green" onions when young, and medium sized flat, clear white bulbs when mature.	.45	1.25	4.25	41.50	400.00
625 WHITE PORTUGAL or SILVERSKIN. For Bunching. Early flat, white onions of mild flavor. Excellent for pickling and early green onions, also for sets and for bunching. The mature bulbs are splendid keepers. This is our most popular white onion.	.50	1.50	5.00	48.00	450.00
626 WHITE SWEET SPANISH. The largest and mildest white onion. Deep globe shape, small necks, very clear skin and firm white flesh. Has rapid vigorous growth and is widely used for bunching as well as mature bulbs.	.55	1.65	5.50	53.00
628 Yellow Globe Danvers.	.40	1.20	4.00	38.50	375.00

ONION SETS

12 to 20 bushels of onion sets are required to plant an acre.

EBENEZER. The Best Yellow Sets. Flattened bulbs, very uniform. Mature early and keep well. See full description of Ebenezer on preceding page.

Bu. (32 lbs.) \$5.60; 2 Bu. \$10.80. 10 bu. or more at \$5.25 per bu. Purchaser pays transportation.

WHITE or Silverskin. Best for bunching. Medium sized flat onions. Clear white, fine appearance.

Bu. (32 lbs.) \$5.75; 2 Bu. \$11.20. 10 bu. or more at \$5.50 per bu. Purchaser pays transportation.

Please note: Orders for onion sets may be entered at any time. They will be shipped as soon as we feel that the danger of freezing is past.

ONION PLANTS

Sweet Spanish—Utah Strain

Excellent for raising both early green onions and dry bulbs for later summer sale. These Texas grown plants will produce splendid, large, firm onions in 8 to 10 weeks. Each year more and more gardeners find it profitable to grow fine onions from our plants, especially for local markets and roadside stands. Experience has proved that our Utah Sweet Spanish is the only satisfactory kind, so we do not offer any other variety.

Please note: Onion plants are sold on the basis of bunches only. In Texas they are pulled by the handful, and each handful is called a bunch. 60 of the bunches are packed in a crate and shipped to us. The number of plants in a bunch usually runs from 50 to 110 or more depending largely on the size of the plants, and it is impossible for us to specify the number of plants in a bunch.

Shipping onion plants: Our plants now come from Texas in a special refrigerated express car, keeping the plants in almost perfect condition. We expect to have the first carload about April 25, and plants will be available after that date until May 15. If you will indicate the approximate date you would like your plants, we will ship as near that time as possible.

Price: 10 bunches \$3.00 postpaid. Not prepaid, full crate (60 bunches) \$9.50. (Weight about 35 lbs. per crate.)

On earlier shipments of 2 crates or more we can also quote special prices f.o.b. Texas shipping point for direct shipment to you. Please write.

For the biggest and finest onions, grow these plants.

PEAS

One pound of peas will plant 100 feet of row. Two to five bushels per acre.

195 World's Record

The Earliest Large Podded Pea (59 days)

Earliness, fine quality, large pods, heavy yield—these are the reasons why World's Record is so tremendously popular today. Without question it is recognized by the best growers as the most profitable for their early crops. The pods are large and attractive, 3 to 4 inches long, pointed, medium dark green and contain large peas of the finest flavor.

The vines are usually about 2½ feet high, sturdy and bear large crops which are ready over a short period of time. We offer an exceptionally dependable early stock of this popular variety which we recommend highly. See prices on next page.

160 Greater Progress

Large Dark Green Pods—Very Prolific (62 days)

As the name implies, this is an improved Laxton's Progress, ripening with us about two days earlier, and bearing more uniformly large pods and a heavier yield.

The vines are not tall, only about 18", but they are husky and literally loaded with large well filled deep green pods (4-4½ in.). They ripen only a few days after World's Record and they mature evenly over a very short period. The pods are all of the same uniform large size giving a most handsome appearance when picked for market. In our opinion, this is the best of the true large-podded early peas. See prices below.

157 Freezonian (New)

Improved Thomas Laxton—All America Winner (62 days)

Developed to replace the famous Thomas Laxton, Freezonian's taller, huskier vines and greater yields give it a big advantage over the older strain.

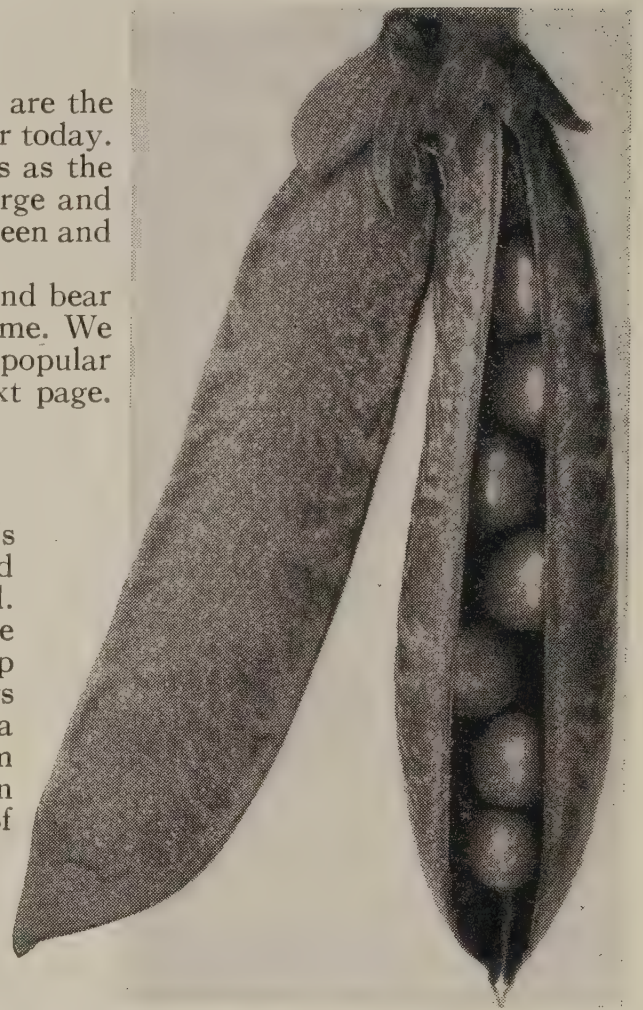

The good-looking blunt pods are slightly larger (3-3½ in.) and hold a far more uniform size with very few small pods. They usually ripen one day later but the pods are filled better and the crops are remarkably heavy.

We highly recommend Freezonian in place of Thomas Laxton. It is ideal for all growers of fine peas for early market. See prices below.

182 Oneida (New)

Dependable Midseason Variety (68 days)

Outstanding among the new varieties for market is Oneida, with good-sized peas of fancy quality. It ripens several days before the large-podded late kinds and easily out-yields them. The blunt pods run 4 to 4½ in. long and are borne on sturdy vines about 2½ ft. high. The peas fill the pods tightly and there are no puffy pods. Dark green and attractive, Oneida should be a quick success. Seed supply limited—15 lbs. per customer. See prices on next page.

WORLD'S RECORD PEAS

193 Victory Freezer (New)

All America Bronze Medal for 1948 (67 days)

For quality peas to fill the season between the early and late kinds, many growers will turn to this hardy and heavy-yielding introduction. Bearing quantities of 3 to 3½ inch, blunt pods of Thomas Laxton type, Victory Freezer ripens so uniformly that the vigorous dark green vines can be stripped at one picking, and since the pods are borne in pairs near the tops of the vines, picking is quite easy.

Tender and delicious, they are well adapted to roadside stands and markets where quality is more important than size. See prices on next page.

SPERGON is by far the best seed treatment for peas. Greatly improves stands and increases yields. Protects against rotting. See page 48.

Early Varieties

25 lbs. or more of one variety will be supplied at the 100 lb. rate. 1 bu. weighs 56 lbs.

157 FREEZONIAN (Improved Thomas Laxton) (3¼ ft.) 62 days.

170 LITTLE MARVEL. (15 in.) Larger-Podded Strain	\$.40	\$2.25	\$4.20	\$14.00	\$25.00
This is a new strain with broader pods and bigger peas. Pods well-filled, excellent quality. Vines stocky and very prolific.					
190 THOMAS LAXTON. (¾ ft.) 61 days. High Quality40	2.25	4.20	14.00	25.00
195 WORLD'S RECORD. (2½ ft.) 59 days. See preceding page45	2.50	4.65	16.00	28.00

Medium and Late Varieties

152 ALDERMAN. (4½ to 6 ft.) Dark Podded. 74 days40	2.25	4.20	14.00	25.00
Still the best of the late tall-growing peas. Very large well-filled pods of excellent quality. Popular on the market and most profitable for growers.					
156 DWARF MARKET. (New.) (2 ft.) 70 days45	2.35	4.35	14.55	26.00
New large-podded midseason pea for eastern market gardeners. Like Dwarf Alderman, but earlier and a better producer. Long pointed dark green pods.					
180 MIDSEASON GIANT. (2 ft.) 72 days40	2.25	4.20	14.00	25.00
One of the best of the large-podded midseason group. Stands up and bears well in hot, dry weather. Dark green, pointed pods. The vigorous vines produce large yields.					
182 ONEIDA. (2½ ft.) 68 days. See preceding page50	2.50	4.65
193 VICTORY FREEZER. (2½ ft.) 67 days. See preceding page45	2.35	4.35	14.55	26.00

*Purchaser pays shipping charges on peas except as follows: If your order for vegetable seeds including peas amounts to \$20.00 or more we will prepay the freight charges. (See also inside front cover.)

PARSLEY

An ounce of seed will sow about 200 feet of row.

	Oz.	¼ lb.	lb.	10 lb.
631 CHAMPION, or Triple Moss Curled	\$.15	\$.45	\$1.30	\$12.00
This is a very superior strain. Although not quite as finely curled as Paramount, it is an early, rapid growing stock which will produce an abundance of fine parsley and give satisfaction wherever used.				
635 PARAMOUNT. Finest Curled. The Outstanding Parsley25	.55	1.50	14.00
We consider this the best strain of parsley obtainable. The leaves are all very finely curled, absolutely uniform and rich deep green in color. Dwarf growth but with stems of good length. It is ideal for forcing and muck growing and also excellent for upland.				
637 PERFECTION. Early. Extra Fine Curled20	.45	1.40	13.00
An excellent variety which grows more vigorously and rapidly than Paramount and has longer stems. The leaves are beautifully cut and curled, and uniform dark emerald green in color. Highly recommended.				
638 Plain Leaf15	.45	1.30	12.00
Large flat leaves, not curled. Used for flavoring.				

Parsley for Roots

633 HAMBURG (Heimisher). Parsnip Rooted. Selected Stock20	.45	1.40	13.00
The roots are up to 8 in. long, parsnip-shaped, smooth and white. We have a very fine stock of this variety, which produces long, straight, thick roots.				

PARSNIPS

*An ounce will sow 150 feet of row.
2½ to 3 lbs. per acre.*

640 Harris' Model

The Whitest Parsnips

These are smooth, snow white, hollow crown parsnips, with a minimum of side roots or prongs. They are of good length, but not too long and their smoothness is quite remarkable, giving the roots a very attractive appearance so that they usually sell for top prices.

There is no better parsnip than "Harris' Model." Seed of our own growing from carefully selected transplanted roots.

Oz. 20c; ¼ lb. 50c; 1 lb. \$1.50; 10 lb. \$14.00; 100 lb. \$130.00.

642 Long Hollow Crown

Better than most stocks. Long smooth roots, not quite as uniform or white as Model.

Oz. 20c; ¼ lb. 45c; 1 lb. \$1.40; 10 lb. \$13.00; 100 lb. \$120.00.

HARRIS' MODEL

Note the smooth, even shape and the remarkable uniformity of these parsnips.

PEPPERS

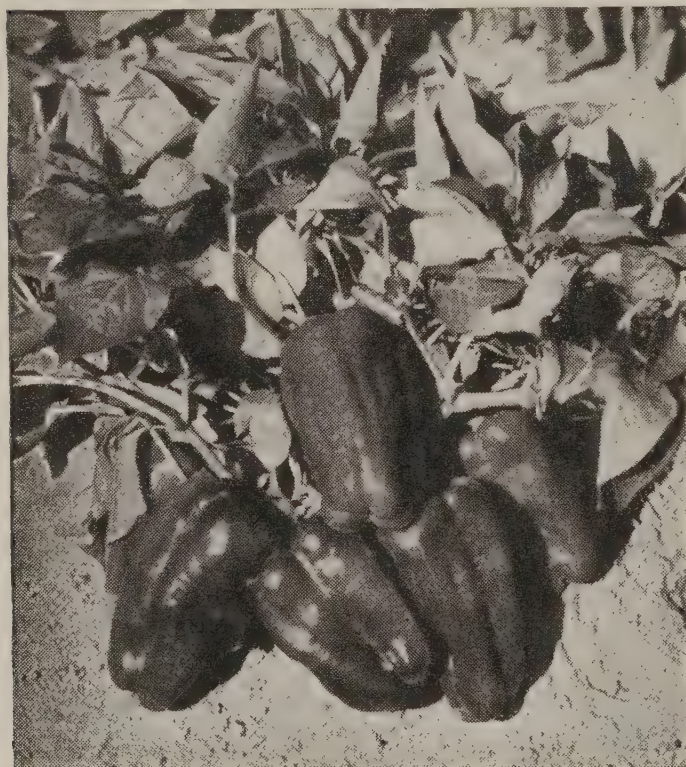

An ounce of seed will produce about 1000 plants.

Harris' Northern Grown Pepper Seed

If you want to make peppers a profitable crop here in the North, use Harris' Northern Grown Pepper Seed. We have specialized for over twenty years in growing peppers on our farm. Years ago we found out that the varieties which are usually grown in the long seasons and warmer climates farther south did not ripen enough fruit to make peppers profitable in the North. So we developed a number of *early, heavy bearing varieties*, which are suited to our conditions and will produce an abundance of ripe fruit wherever the seasons are short.

660 Harris' Earliest

This extra early pepper produces ripe fruit before any other kind. The plants are dwarf but amazingly prolific and the small peppers turn bright red very quickly. It is profitable for first early crop in many sections and especially valuable for extreme northern areas where other peppers will not ripen. See prices on next page.

HARRIS' KING OF THE NORTH

Our special strain is famous for earliness, large fruit and tremendous yields.

663 Harris' King of the North

Since we introduced this variety over ten years ago, it has earned a reputation of producing greater yields of large peppers here in the North than any variety grown. The plants are medium size, branching and literally covered with immense fruit. The photo above shows the shape, large size and enormous yield per plant.

The peppers are dark green in color, turning to a rich deep red when ripe. The flesh is firm, mild and sweet.

Harris' Northern grown seed of this variety is by far the best strain obtainable. Do not take chances with inferior seed, but buy direct from us and get the true original early strain. See prices on next page.

HARRIS PEPPER PLANTS

We specialize in growing fine, strong, true to name pepper plants, both seedlings and transplanted. See page 34.

675 Pennwonder (New)

*Consistently Good Yields of Heavy Fruit
(See photo on back cover)*

Here is a fine new pepper for short season areas. It is very early, usually a little ahead of Harris' Wonder and highly productive under many conditions. Although the fruit are not quite as blocky or smooth as Harris' Wonder (a few are almost pointed), they are good-sized, slightly thicker meated and can be picked easily without breaking the plant. The vines are dwarf but vigorous and bear big crops.

Prof. M. L. Odland of Pennsylvania State College developed Pennwonder from a cross between our Harris' Earliest and California Wonder, and the result successfully combines the best features of both, producing a heavy, fine quality new pepper for the Northeast. See prices on next page.

665 Harris' Wonder

Early—Prolific—Thick Meat

Without sacrificing any of the earliness or heavy yields which have made this pepper an outstanding variety for the North, we have improved the size and uniformly fine shape by pure line selection. The fruits are even more uniform and handsome than before.

Harris' Wonder is a very smooth, thick fleshed California Wonder type which will give you not only enormous crops of green peppers but an abundance of ripe fruit before frost.

The peppers are large, chunky and beautiful dark green turning to rich red when ripe. They are very thick meated and the quality is excellent. A level bushel weighs over 30 lbs. See prices on next page.

HARRIS' WONDER PEPPERS

656 Calwonder—Early

This variety ripens at least a week earlier than California Wonder and produces heavy crops of fine large blocky fruit of the same type as that variety. The peppers are 3 and 4 lobed, large, fairly smooth with thick flesh.

The plants are dwarf and very sturdy and they produce big heavy peppers in great abundance. Calwonder is well adapted for shorter seasons and is very popular in New England and many other sections. The seed we offer is of our own growing. See prices below.

652 California Wonder

We offer a very superior stock of this fine pepper, which is so widely grown by market gardeners in all sections. The plants are of strong, sturdy character and very prolific, bearing large crops of fine big peppers. The peppers are of the true California Wonder type, smooth and heavy, having very thick flesh. We are sure you will like this stock. See prices below.

CALWONDER—EARLY

	Oz.	¼ lb.	lb.
652 CALIFORNIA WONDER. Thick flesh. True Stock. See above.....	\$.70	\$2.10	\$7.00
656 CALWONDER, EARLY. See above.....	.70	2.10	7.00
660 HARRIS' EARLIEST. The Earliest Sweet Pepper. See preceding page.....	.75	2.20	7.50
662 HARRIS' IMPROVED SQUASH.....	.70	2.10	7.00
The true "Squash" shape but three times as heavy yielding as the older strains. Very early, with thick sweet flesh, deep red in color. Profitable in the North.			
663 HARRIS' KING OF THE NORTH. See preceding page.....	.70	2.10	7.00
665 HARRIS' WONDER. Early—Thick Fleshed. See preceding page.....	.70	2.10	7.00
668 HEIFER HORN. (Hot) Private Stock.....	.70	2.10	7.00
One of the largest and best hot peppers and has now replaced the old Giant Cayenne. This is a special market gardeners' stock, and is notable for its heavy early yields. We recommend it highly.			
670 HOT PORTUGAL. Large Hot.....	.80	2.40	8.00
Finest of the large hot peppers. Quite smooth and very heavy yielding. Usually averages 6" long and is as hot as the old Giant Cayenne. True stock, grown on our own farms.			
672 HUNGARIAN WAX. (Hot) Long Type.....	.75	2.20	7.50
The peppers are 4 to 4½ in. long by 1½ in. at the stem end and pointed. Waxy yellow when young, turning red when ripe. Very hot. Ours is a fine, even stock.			
674 LARGE RED CHERRY. (Hot) Small Round Fruit. Late.....	.70	2.10	7.00
675 PENNWONDER. (New) Early, Thick-Fleshed Fruit. See preceding page.....	.85	2.65	9.00
676 OSHKOSH. The Largest and Best Yellow Pepper.....	.75	2.20	7.50
677 ROUMANIAN WAX. Semi-Hot.....	Crop Failed.....		
Attractive waxy yellow peppers, turning brilliant red when fully ripe.			
681 WORLDBEATER, EARLY STRAIN. (New) Large and Prolific.....	.70	2.10	7.00
This splendid new strain enables growers to get fine large Worldbeater peppers in Northern sections, as it ripens earlier than the regular stocks. The fruits are very large, long and thick fleshed; the vines are husky and remarkably prolific. A most uniform and attractive stock, which we recommend highly.			

PUMPKINS

An ounce of seed will plant 20 hills; about 3 lbs. to the acre.

	Oz.	¼ lb.	lb.	10 lb.
686 CONNECTICUT FIELD or Big Tom.....	\$.20	\$.45	\$1.40	\$13.00
The standard large pumpkin. True stock.				
688 Large Cheese.....	.15	.45	1.30	12.00
690 Mammoth Potiron or King of the Mammoths.....	.20	.65	2.00
692 ORANGE WINTER LUXURY.....	.20	.45	1.40	13.00
This improved strain has netted deep orange skin and orange yellow flesh. A very uniform stock.				
695 SMALL SUGAR or Pie Pumpkin. Profitable to Grow.....	.20	.45	1.40	13.00
The most popular variety for market. Small fruit (6 to 8 lbs.) but extremely prolific. Hard deep orange skin, good keeper; flesh thick and dry, and of excellent quality.				

RADISH

$\frac{1}{4}$ lb. of seed will sow about 300 ft. of row.

CAVALIER RADISH

Note the short tops and fine shape.

716 Early Scarlet Globe Special Strain

Very Uniform and Attractive

This is a very fine short top strain, equally valuable for forcing and for outdoor growing, especially on muck. The small tops are ideal for bunching and the oval-shaped roots are rich bright scarlet in color. The flesh is clear white and firm. A very uniform stock which we can recommend highly. See prices on next page.

707 Comet

Long Standing Round—Popular on Many Markets

The best for late spring and summer planting as it will stay crisp and solid in warm weather when other kinds become pithy. It grows larger than the regular Early Scarlet Globe types and has a bright scarlet color. The shape is round with fine tap roots and the radishes are very attractive. They sell readily on many markets and the fine quality brings customers back for more. See prices on next page.

725 Icicle Radish (White)

Short-Topped Strain—Also Called Pearl Forcing

This is an ideal stock of Icicle Radish, both for forcing and outdoors and can also be grown successfully on muck. It is so much superior to ordinary stocks of Icicle that there is no comparison. The radishes are uniformly smooth and clear white. The tops do not grow too long in the greenhouses or frames, but are long enough for bunching when grown outdoors.

This stock is the same fine, true short-topped strain that we have sold for years, and we have yet to see anything that will equal it. See prices on next page.

705 Cavalier

Best Short Top Scarlet Globe Radish

The short tops, brilliant deep scarlet color, beautiful shape and ability to stand a long time make this the best forcing type we have ever seen. These radishes are firm and solid, of the true olive shape and unusually uniform for type. It is often possible to pull practically 100% of number one radishes. Cavalier is also especially good on muck soils.

Growers everywhere are most enthusiastic over it and many of them tell us that these radishes sell for the best prices even when the market is slow. See prices on next page.

715 Early Scarlet Globe Long Island Strain

Medium Topped—Ideal for Outdoor Growing

This excellent radish has become extremely popular among critical market growers in many sections because of its quick growth and uniformly fine type. It is a medium topped strain, and forms even, solid bulbs of brilliant scarlet color with crisp, white flesh. In general the shape is more rounded than Cavalier.

Our "Long Island Strain" is one of the best radishes for outdoor sowing, especially where the rounder shape is preferred. See prices on next page.

COMET RADISH

Long-standing round type for outdoors.

RADISHES—Continued

25 lbs. or more of any one variety will be supplied at the 100 lb. rate.

	¼ lb.	lb.	10 lb.	100 lb.
705 CAVALIER. Short Top Scarlet Globe. See preceding page	\$.35	\$1.10	\$10.50	\$100.00
707 COMET. Round, Bright Scarlet—Long Standing. See preceding page..	.35	1.10	10.50	100.00
710 EARLIEST SCARLET WHITE-TIPPED. Forcing Strain.35	1.10	10.50
The radishes are round, brilliant scarlet with white bottoms. This is the finest strain of white-tipped radish, having small tops and is superior both for forcing and outdoor growing.				
715 EARLY SCARLET GLOBE. Long Island Strain. See preceding page30	.90	8.50	80.00
716 EARLY SCARLET GLOBE. Special Strain. See preceding page35	1.10	10.50	100.00
722 GIANT WHITE STUTTGART.30	1.00	9.00
Large, round, top-shaped white radish. Valuable for summer as it stands a very long time without becoming pithy.				
725 ICICLE or Pearl Forcing. Short-topped Strain. See preceding page30	1.00	9.00	85.00
734 WHITE STRASBURG.35	1.05	10.00
Popular for summer use. Roots large and white with tapering shape.				

Winter Radish

Sow in August and store in moist sand for winter.

701 BLACK SPANISH TURNIP.35	1.10	10.50
Roots are round or turnip shaped and grow very uniform in shape and size. Clear white flesh, skin deep black without white streaks.				

RHUBARB or Pie Plant
MacDonald Rhubarb Roots

We have an exceptionally fine lot of roots of the now famous MacDonald Rhubarb. This variety is by far the best and most widely grown red rhubarb.

The plant is vigorous and strong, producing large tender stalks which are deep crimson in color. They make a very attractive bunch and when cooked the sauce is a beautiful deep pink and of excellent flavor. Market growers find this rhubarb sells readily at the highest prices.

This variety cannot be produced from seed, so we offer root divisions only.

Strong root divisions: 25 roots—\$7.50; 100—\$25.00. Purchaser pays transportation. (Weight about 1½ lbs. each.)

SALSIFY (Vegetable Oyster)

¼ lb. of seed will sow about 400 feet of row.

740 MAMMOTH SANDWICH ISLAND.
The largest and best variety. Long, tapering, fleshy roots with but few side shoots.
¼ lb. \$1.15; lb. \$3.50; 10 lbs. \$32.50.

SORREL

¼ lb. of seed will sow about 1000 feet of row.

745 NARROW LEAVED. Special Strain.
This is the best variety for market, producing long slender bright green leaves.
¼ lb. \$1.90; lb. \$6.00.

“Last year I used many varieties of your seeds with excellent results. The great care you take to keep your strains pure and also free from disease certainly makes a great difference. You are to be congratulated on your fine work, and I will highly recommend your seeds to my friends.”

Alden M. Webber, Bedford, Mass., Feb. 18, 1947

SWISS CHARD

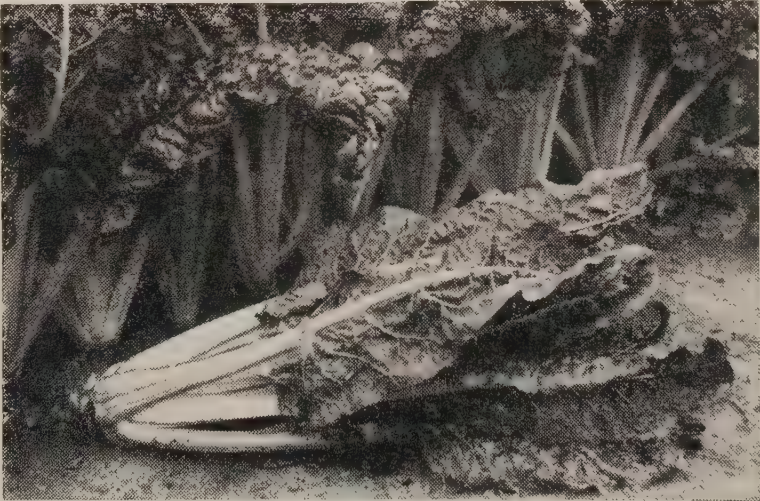

¼ lb. of seed will sow about 250 feet of row.

830 Fordhook Giant
Best for Market

This is the most popular variety. The leaves are large, thick, heavily crumpled and very dark green. The stems are broad, thick and white. A very uniform type.

¼ lb. 45c; lb. \$1.35; 10 lbs. \$12.50.

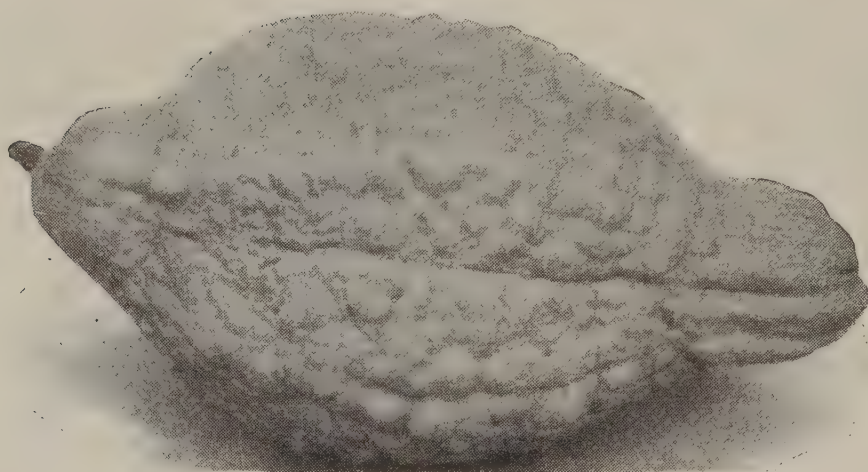

834 LUCULLUS. Very popular light green type. Grows upright with heavily “Savoyed” leaves of fine quality. Stems long, thick and nearly white.
¼ lb. 40c; lb. \$1.25; 10 lbs. \$11.50.

FORDHOOK GIANT

WINTER SQUASH

1/4 lb. of seed will plant 50 hills; 3 to 4 lbs. of seed per acre.

BLUE HUBBARD SQUASH

810 Quality

Roadside stands and markets are experiencing an ever-increasing demand for a superior, small squash, and Quality fills this need to perfection.

This squash has dark olive green color and an attractive heart shape which gives extra thickness of flesh at the shoulders. Its firm thick flesh is dry and sweet and of the finest quality. Customers come back for more of this kind. *Seed of our own growing.* See prices below.

815 Royal Acorn

The demand for this large size Table Queen squash is growing by leaps and bounds because growers find it the most profitable kind to raise. The fruit have the true pointed acorn shape but are larger than the regular Table Queen, measuring about 6-7 in. long and 5 in. across. There is always a ready market for these attractive dark green squash and the big vines yield tremendous crops. See prices below.

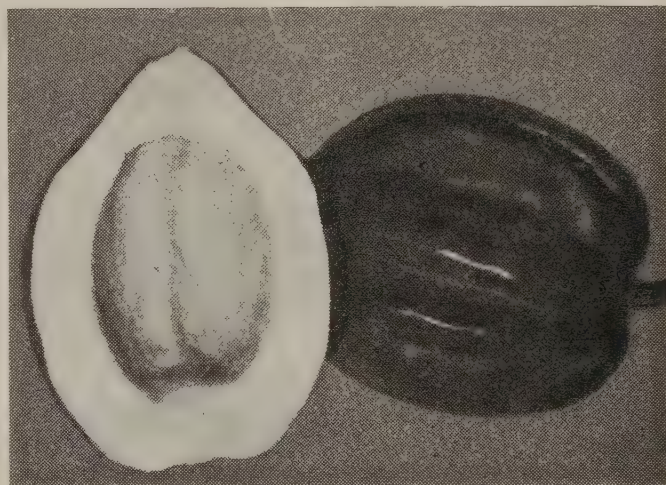

770 Blue Hubbard

Harris' Famous Selected Strain

Our special large, rugged strain produces immense yields of big, well-shaped squash that bring the highest prices. The thick-fleshed fruit is uniformly heavy and stores well.

Our strain is the result of years of careful breeding here on our own farms, and is generally recognized as the finest, purest stock grown. The seed we sell is all of our own growing and cannot be obtained elsewhere.

Blue Hubbard is now in good demand on nearly all markets in the East and the fine quality, enormous yields and excellent keeping quality of our famous strain make it the most profitable squash to grow. See prices below.

ROYAL ACORN

	Oz.	1/4 lb.	lb.	10 lb.
770 BLUE HUBBARD. Selected Strain. See above.....	\$.35	\$1.00	\$3.00	\$27.50
772 Boston Marrow.....	.20	.50	1.50	14.00
Popular fall squash, deep orange color. Used principally for canning and pies.				
773 BUTTERCUP. Finest Quality.....	.40	1.10	3.25	30.00
This fine small squash has excellent quality and exceptionally thick sweet flesh and has become very popular for roadside stands and local markets. The shape is rather flat with a distinctive "button."				
774 BUTTERNUT. (New). Special Stock. See next page.....	.60	1.75	6.00	57.50
780 DELICIOUS. The Most Popular Medium Size Squash.....	.25	.75	2.50	22.50
This has now become a standard high quality type on Eastern markets. Squash medium sized, with attractive pointed shape, and very deep green color. Flesh bright orange, very dry and sweet. Our stock is exceptionally fine.				
792 GOLDEN DELICIOUS. Large, Heavy-Yielding Strain.....	.25	.75	2.50	22.50
This strain produces enormous crops of thick-meated orange squash of superb quality. Excellent for market as well as commercial canning and freezing.				
793 Golden Hubbard.....	.25	.75	2.50	22.50
797 HUBBARD—True.....	.25	.70	2.25	20.00
Dark green smooth skin, fruit of high quality. We have a fine true strain.				
800 IMPROVED WARTED HUBBARD. (Dark Green).....	.25	.75	2.50	22.50
Larger, more warted, and darker green than the true Hubbard squash. An excellent stock that will produce large crops of the finest squash.				
810 QUALITY. See above.....	.35	1.00	3.00	27.50
815 ROYAL ACORN. (Mammoth Table Queen). See above.....	.20	.60	2.00	17.50
820 TABLE QUEEN. Also called Acorn and Des Moines.....	.20	.60	2.00	17.50
The Individual Squash. Small dark green fruit 5 to 6 in. long 4 1/2 in. in diameter, deeply ribbed and very hard. We have a fine even stock of this popular variety.				
823 WARREN. Improved Essex Hybrid.....	.35	1.00	3.00	27.50
Our own special strain of this popular New England type. Squash are medium sized, heavily warted and bright orange red in color. They have a distinctive "button" at the blossom end, and the flesh is thick, fine-grained and sweet.				

774 Butternut (New)

Attractive Small Winter Squash—Fine Quality

Only recently introduced but already commanding premium prices on many markets, Butternut is fast becoming one of the most popular winter squash in the East.

Many desirable features make it a favorite with growers and customers alike—its long, distinctive shape; its yellow dry, sweet flesh; its excellent quality. The tiny seed cavity at the end means that this squash is practically 100% meat, as shown in the photo. Butternut matures early and bears big crops for late summer and early fall sale. Many growers report that it will succeed even on poorer soils and it is resistant to squash vine borers. See prices on preceding page.

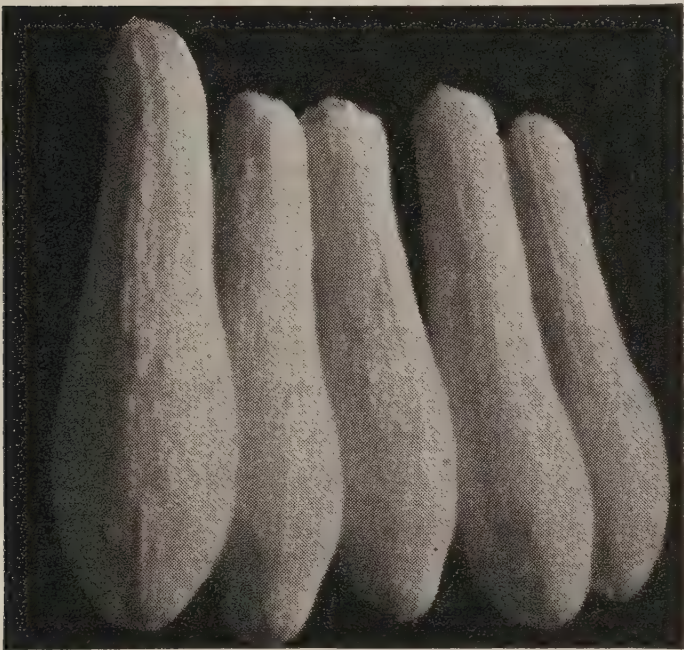

BUTTERNUT

These small squash are increasingly popular.

SUMMER SQUASH

1/4 lb. of seed will plant about 100 hills; 5 to 6 lbs. of seed per acre.

YANKEE HYBRID

795 Harris' Improved Cocozelle

Ours is the long, slender, straight type of Cocozelle that critical squash growers want. Developed and grown entirely by us, it produces longer, more slender and uniform fruits than any other Italian Vegetable Marrow and makes a very fancy pack. These squash carry the desired dark green base color with stripes of lighter green. The bush-type plants are very prolific. This is the kind to grow. See prices below.

825 Yankee Hybrid

Enormous Early Yields

The remarkable earliness and vigor of this hybrid have won it top place with many growers. It is not only the first to ripen but yields more on the early pickings and more altogether throughout the season.

The squash are of the finest type, extremely uniform and with straight, thick necks. The skin is slightly roughened and of a glowing waxy yellow color that makes them very attractive.

We offer only first generation hybrid seed, grown directly from pure line inbreds. This is a difficult process but is essential to get the maximum earliness, vigor and uniformity. See prices below.

785 Early Yellow Prolific

Uniform and Attractive

This is now definitely established as one of the finest and most widely grown varieties. It is a tremendous improvement over the old Giant Straightneck squash, and the dwarf vines bear great crops of beautiful smooth fruit. These squash are very uniform for shape and size and are remarkable for their smooth skin and clear bright yellow color, having no trace of green even when very young.

We now produce this seed here on our own farm and can assure our customers that no better stock of this variety can be obtained. See prices below.

	Oz.	1/4 lb.	lb.	10 lb.
776 DARK GREEN ZUCCHINI. Special Long Strain.....	\$.20	\$.60	\$2.00	\$17.50
This is a very superior strain with uniformly long dark green fruit, entirely without light grey fruit or light stripes. Exactly what is wanted.				
785 EARLY YELLOW PROLIFIC. See above.....	.20	.55	1.75	15.00
788 GIANT SUMMER STRAIGHTNECK.....	.20	.50	1.50	13.50
This popular strain fills the demand for a large straight-neck summer squash of clear butter yellow color. The bright, attractive fruits are even in shape and have a slightly roughened surface, and the vines are large and prolific.				
795 HARRIS' IMPROVED COCOZELLE. See above.....	.25	.70	2.25	21.00
807 MAMMOTH WHITE BUSH SCALLOP. Also called "Cymling".....	.20	.55	1.75	15.00
The popular type, producing large yields of thick creamy white, well scalloped fruit. Bush vines.				
825 YANKEE HYBRID. Extra Early, Heavy Yielder. See above.....	.55	1.60	5.50	50.00

SPINACH

Sow about 12 to 20 lbs. of seed per acre in rows.

Spinach Seed for 1948

We are pleased to announce that Holland has had good spinach seed crops this past year, and we can again supply the fine strains of imported seed which were so outstanding before the war. All these stocks have been carefully checked here on our farm and have proved to be well up to pre-war standards of quality. Our strains for 1948 are far superior to most spinach, either domestic or imported, offered today and we unhesitatingly recommend them to our customers.

SPECIAL SUMMER SAVOY

755 Long Standing Bloomsdale

This year we offer an excellent large-growing strain of this famous variety which we recommend especially for early spring plantings. It has a faster growth and a broader frame than Special Summer Savoy and can be cut sooner. It stands without bolting almost as long and the big, deep green, well crumpled leaves "bushel up" fast. This is a beautiful true stock of vigorous, attractive spinach and will give satisfaction wherever used. See prices below.

768 Viking

This early, large-leaved spinach grows rapidly and gets to cutting size early, yet will stand without going to seed for a long time. It is a flatter leaf type than the Savoys, with big, broad, dark green leaves and produces immense crops of fine-looking spinach. Widely grown for canning and commercial use. See prices below.

765 Special Summer Savoy

Extra Selected—Long Standing

We highly recommend this remarkable strain as the best long-standing spinach to be had. Every plant is of the true type with large beautifully crumpled or "Savoyed" leaves; the color is a very attractive deep green and the spinach stands a long time even in hot weather without bolting to seed. Growers find that the yield per acre is consistently heavy.

This is the best kind for spring sowing and is also used for late fall sowing for spring crop as it is very hardy. We urge our customers to plant this extra fine stock of imported spinach seed, for it is the most profitable kind to grow. See prices below.

750 Blight Resistant Savoy

Best for Fall Crops

We have an exceptionally good stock of this popular variety. It is the true Virginia Strain, practically 100% resistant to blight and can be depended on to produce large crops in the fall where other varieties blight and fail entirely. The type is excellent with dark green well crumpled leaves and the yields are very heavy.

Blight Resistant Savoy does not stand as well as some other kinds in the spring, although our strain will stand three to four days longer than most strains of this variety. See prices below.

ARASAN is the best seed treatment for spinach. See page 48.

We shall be glad to quote special prices to growers who use larger quantities of spinach than listed here. Please write. 25 lbs. or more of any one variety supplied at 100 lb. rate.

	lb.	10 lb.	100 lb.
750 BLIGHT RESISTANT SAVOY. For Fall Crop. See above.....	\$.50	\$4.50	\$40.00
752 DARK GREEN BLOOMSDALE. Special Stock.....	.50	4.50	40.00
This extra dark green strain is very early with large heavily crumpled leaves, yet stands almost as well as Long Standing. 100% uniform, exceptional deep color holds well for market. Used for early spring and for wintering over.			
755 LONG STANDING BLOOMSDALE. Best Imported Stock. See above.....	.55	5.00	45.00
762 OLD DOMINION. For Fall Crop.....	.50	4.50	40.00
Very popular for spring sowing in places where blight affects spinach and also for early fall sowing as it is <i>blight resistant</i> and will stand longer without going to seed than Blight Resistant Savoy. The leaves are large, dark green, well blistered or "Savoyed," producing large crops which stand up well when shipped.			
765 SPECIAL SUMMER SAVOY. See above.....	.55	5.00	45.00
768 VIKING. Large Leaved—Long Standing. See above.....	.55	5.00	45.00
758 NEW ZEALAND SPINACH. Valuable for Summer.....	1/4 lb. 35c 1.00	9.00
Not a true spinach, but grows a large plant with small thick leaves that may be cut repeatedly. Valuable for greens in hot dry weather. Seed germinates slowly and should be soaked 24 hours before planting.			

TOMATOES

An ounce of seed will produce about 2000 plants.

Harris' New York State Certified Tomato Seed

For more than ten successive years, we have offered **New York State Certified Tomato Seed** of our own growing. This seed must meet the highest standards of purity and *freedom from disease*.

Again this year our tomato fields were thoroughly sprayed throughout the season, giving us excellent control of all diseases, including late blight. Our crops have fully met the strict requirements for Certified Seed and we can confidently say that the seed we offer is the best obtainable.

We now offer an added service and an added protection to our customers—all our certified seed is **Hot Water Treated**. This eliminates any possibility of disease being carried on the seed. If you want the finest strains and the purest seed, grow Harris' Certified Tomato Seed.

890 Victor

The Earliest Good-Sized Tomato

An extra early variety of great popularity in many sections. It ripens large clusters of fine tomatoes all at once, well ahead of the main crop varieties.

The tomatoes are of good size, smooth and solid. They ripen evenly to a brilliant scarlet color all over, with no green spots.

The vine is sturdy, dwarf and compact and should be planted close to get more early fruit per acre. In sections where it does well, Victor is by far the best extra early tomato.

N. Y. State Certified Seed of our own growing. See prices on page 33.

860 Gem (New)

Well Worth a Trial for Early Crops.

(See Photo on Front Cover.)

We liked this distinct new tomato so well at the Geneva Experiment Station that we have grown a seed crop to offer our customers. The first fruit ripen almost as early as Valiant and close planting (3 x 4 or 2 x 5 ft.) gives heavy early yields. The dwarf compact vines set several large clusters of fruit near the center of the plant and these tend to ripen nearly all together, making Gem one of the easiest tomatoes to pick.

They are of fine type—large, smooth and almost perfectly round—and hold their size and shape well all season. The color is an even pale green before ripening and turns to a good solid red.

Gem should be grown on moist, fertile soil to get sufficient foliage coverage. **N.Y. State Certified Seed** of our own growing. See prices on page 33.

STOKESDALE—The handsome shape is characteristic.

VALIANT—Heavy early yields—fine big tomatoes.

889 Valiant

Very Early—Large Fruit

Our strain of Valiant wins more growers every year. It is very early, yet the tomatoes are smooth with a deep round shape and a solid meaty interior. They are so much larger and finer than the old Earliana that that variety has now been almost entirely displaced. Valiant colors up better and has superior quality.

The vines have an open, spreading habit of growth, and do best when well fertilized and grown on fairly heavy soil. The yields are heavy, and Valiant is highly profitable for early market. Our strain is the true early type and we are pleased to offer **N. Y. State Certified Seed** produced here on our farms. See prices on page 33.

888 Stokesdale

Heavy Yielding Medium Early Type

If you want a second early tomato that will produce heavy crops of fine smooth fruit under almost all conditions, grow Stokesdale. Year after year, Stokesdale proves to be the most dependable variety of all the kinds we produce. The fruit is medium sized, with a very uniform smooth, deep globe shape, bright scarlet color and fine quality. The fruit ripens evenly and is very free of cracks and blemishes.

The yields are extremely heavy and the vines make a strong vigorous growth. Stokesdale is an all-purpose tomato, excellent for market, shipping and canning. Our strain is by far the best obtainable and we offer only **N. Y. State Certified Seed** of our own growing. See prices on page 33.

TOMATOES—Continued on Next Page

TOMATOES—Continued

867 John Baer—Improved Strain

Our N. Y. Certified John Baer is well recognized as the finest strain of this old favorite variety. It will produce larger fruit and more tons of fine tomatoes to the acre than any strain we have ever seen. The fruit is large for this variety, smooth and deep red throughout, coloring right up to the stem. The vines are vigorous and healthy and produce heavy crops.

We regard Improved John Baer as one of the best medium early tomatoes, and can recommend it highly both for market and canning. **N. Y. State Certified Seed** of our own growing. See prices on next page.

RUTGERS—A single cluster from our crop.

885 Rutgers—Harris' Northern Grown Strain

The Best Main Crop Tomato

In our opinion Rutgers is the finest main crop tomato grown today. It combines large size, solid structure, fine flavor and a beautiful rich red color that goes all through the fruit, making it excellent for both market and canning. The vines are large and very husky and stand up well even late in the season; they bear tremendous crops of fine heavy fruit.

Our strain has been grown and selected here in the North for years and has proved to be the best strain obtainable. The earliness and yield, the uniformly large size and smooth even shape of the fruit have all been improved as a result of careful breeding on our farm ever since this fine variety was introduced. **New York State Certified Tomato Seed** of our own growing. See prices on next page.

853 Comet Tomato

For Greenhouse and Trellis Growing

Our stock is used regularly by some of the largest and best growers of greenhouse and trellis tomatoes, where a medium size fruit is wanted. We are pleased to offer **N. Y. State Certified Seed** of this fine strain of Comet Tomato. The seed is saved only from the best fruit on trellis grown plants and has been found superior for both greenhouse use and growing outside on supports.

Pkt. 25c; ¼ Oz. \$1.10; ½ Oz. \$1.90; Oz. \$3.50; ¼ lb. \$12.00.

SMALL FRUITED TOMATOES

Popular to use in pickles, salads and preserves.

Varieties: 879 Red Cherry, 881 Red Pear, 882 Red Plum, 893 Yellow Cherry, 894 Yellow Pear, 895 Yellow Plum, 863 Ground Cherry (Husk).

Pkt. 15c; ½ oz. 50c; Oz. 90c; ¼ lb. \$3.00.

Any three pkts. 40c; any three ½ oz. \$1.25.

TOMATOES—Continued on next page.

868 Longred

Not a Long Tomato but a Good Round One, for a Long Season—(See Photo on Front Cover.)

Another fine variety from Prof. Tapley at Geneva, Longred is a main crop type, ripening a little later than John Baer and very heavy yielding. The fruit are good-sized, about like Stokesdale, and are very solid and heavy with deep globe shape and exceptionally smooth and uniform appearance. The color is good both inside and out, and the green fruit have the distinct pale color that goes with even-ripening and comparatively little cracking. We expect it to be popular on the market and with canners.

Ample foliage is combined with ease of picking on the vigorous plants. Longred tends to set fruit very freely, resulting in heavy yields at each picking. We are pleased to offer **New York State Certified Seed** grown here on our farms. See prices on next page.

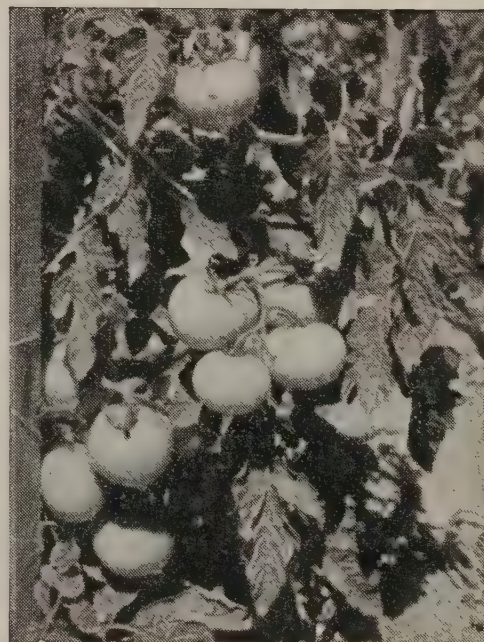

875 Pritchard's Scarlet Topper

Also Called "Pritchard"

Because of its fine quality and beautiful appearance this tomato has become one of our most popular market varieties. Our strain, raised here in the North for many years, is outstanding for size, vigor, yield and earliness.

Ripening just after John Baer this heavy yielder has a fine red color all the way through its remarkably solid flesh. It is quite free from cracking and the quality is extra fine—mild and without acidity.

The plants are robust but not of rank growth. We offer the finest **N. Y. State Certified Seed** of our own growing. See prices on next page.

COMET TOMATO

TOMATOES—Continued

	Oz.	¼ lb.	lb.
850 BONNY BEST.....	\$.70	\$2.10	\$7.00
853 COMET. Forcing and Trellis Tomato. (N. Y. Certified Seed—Hot Water Treated) See preceding page.....
855 Dwarf Champion.....	.75	2.25	7.50
Early and medium sized. Vines of dwarf tree type, dark green leaves. Pink fruit.			
856 Dwarf Stone.....	.80	2.40	8.00
Sturdy, compact, tree-like plant with flattened globe-shaped fruit of bright red color. This is the most popular of the dwarf varieties.			
859 EARLY DETROIT. The Best Early Pink Tomato.....	.65	1.95	6.50
A very fine pink variety with smooth, evenly colored fruit of good size.			
860 GEM (New) (N. Y. Certified Seed—Hot Water Treated) See page 31.....	.90	2.85	9.50
862 GOLDEN JUBILEE. The Best Orange.....	.80	2.40	8.00
Far better than any other yellow-orange variety. Smooth deep globe shaped, solid and meaty with excellent flavor and very mild taste. Handsome golden orange skin, deep orange flesh. Seed of our own growing.			
865 ITALIAN RED PEAR. Pomo d'oro a Pero (N. Y. Certified Seed—Hot Water Treated)	.85	2.60	8.75
Large pear shaped tomatoes borne in clusters of 4 to 7 fruits on vigorous vines. Widely used for tomato paste and canning "Italian style."			
867 JOHN BAER. (N. Y. Certified Seed—Hot Water Treated) See preceding page5 lbs. \$35.00	.70	2.15	7.25

HYBRID TOMATO—We have produced a small amount of the early hybrid, Earliana x Valiant. See Retail Catalog for description and prices.

TURNIPS

It requires 1 to 1½ lbs. of seed per acre in drills, or 2 to 2½ lbs. broadcast.

920 Purple Top White Globe

Special Strain—Very Uniform

This stock of Purple Top White Globe turnip continues to produce the smoothest, handsomest turnips we have ever seen. The turnips are a snowy white with bright purple tops and the shape is smooth and round. This strain is very uniform and all the turnips are of the finest type.

It costs no more to grow these fine turnips, and their attractive appearance makes them sell much better on the market. See prices below.

	¼ lb.	lb.	10 lb.
906 GOLDEN BALL. The Smoothest Yellow Turnip.....	\$.35	\$1.00	\$ 9.00
Round, smooth yellow. Much the best to grow where a yellow turnip is wanted.			
920 PURPLE TOP WHITE GLOBE. Special Strain. See above.....	.30	.90	8.00
928 SHOGGIN. The Best Foliage Variety.....	.35	1.10	10.00
The best turnip for greens, very much superior to Seven Top. The turnips are white, oblong in shape and of fine quality. The tops are light green, of good quality and grow in clusters.			

RUTA BAGAS

	¼ lb.	lb.	10 lb.
910 IMPROVED LONG ISLAND. Best for Market and Storage.....	\$.35	\$1.10	\$10.00
An excellent strain of this standard all-purpose variety. Large, smooth globe-shaped roots without too much neck. Yellow with purple tops and sweet, light yellow flesh. Very heavy yields.			
915 MACOMBER, White Flesh, Finest Quality..... Oz. \$.25	.75	2.00	19.00
Mild flavored and sweet. Roots nearly round with little neck, and white in color with green or purplish tops. Clear white, fine-grained flesh. Excellent for roadside stands and local markets.			

VEGETABLE PLANTS

Orders for plants will be entered at any time. The plants will be sent when ready, or if ordered for specific dates as near the date as possible. Orders for the same shipping date are filled according to date received; so it is always wise to order early.

PLEASE NOTE: Our plants are expertly and carefully packed so that they should reach you in good condition, but if they are delayed on the road or for any other reason, they arrive in poor shape, let us know at once and proper adjustment will be made. We cannot be responsible for the plants living after they are planted as this depends on how they are planted and the soil and weather conditions, over which we have no control.

A Greenhouse of Early Cabbage on Moreton Farm.

Except where noted, the plants are sent at the expense of the purchaser.

If plants are wanted by parcel post an extra charge is made for postage as follows: To places in the 2nd zone (150 miles) 1c per lb., 3rd zone 2c per lb., 4th zone 4c per lb.

NOTE: Both mail and express shipments are still not handled as quickly as before the war and allowance should be made for possible slow delivery.

- CABBAGE. Early transplanted plants.....Not prepaid 500 plants \$6.50, 1000 \$12.00.**
Ready April 15 to May 15. Well hardened in cold frames and will stand considerable frost. Golden Acre Special only. Weight 500-14 lbs., 1000-25 lbs.
(We can supply limited quantities of field grown Cabbage, Broccoli and Brussels Sprouts plants after June 20. See our general catalog published in January.)
- CAULIFLOWER. Early transplanted plants.....Not prepaid 500 plants \$7.50, 1000 \$14.00.**

HARRIS' FLOWER SEEDS

FIELD TESTED FOR YOUR PROTECTION.

Here is a section of our Flower Trial Grounds where we have an opportunity to compare many strains of flower seeds and to see how the ones which we offer compare with those of other seedsmen.

Then, too, many of the varieties and strains of flower seeds for which Harris is famous are grown here at Moreton Farm under constant supervision of our plant breeders. That's why we can say with assurance that you can get no better flower seeds anywhere at any price.

For terms see inside front cover

SEE OUR RETAIL CATALOG FOR MORE COMPLETE DESCRIPTIONS

WILT RESISTANT ASTERS

HARRIS 8-BEST MIXTURE

For good performance under all conditions, for wide color range and variation in form of flowers there is no finer mixture. We use equal quantities of the following eight best wilt resistant varieties.

Crego Shell Pink	Early Giant Light Blue
Crego Deep Rose	Early Giant Peach Blossom
Peerless Pink	Am. Branching Purple
Heart of France	Am. Branching White

W1500 Lg. Pkt. 20c; ¼ Oz. 50c; Oz. \$1.60; ¼ Lb. \$5.00.

AMERICAN BRANCHING ASTERS

The standard mid-season variety with broad incurved petals.

W1601 White	W1605 Purple
W1602 Flesh Pink	W1606 Crimson
W1603 Rose	W1607 Peach Blossom
W1604 Azure Blue	

ABOVE COLORS: Lg. Pkt. 25c; ¼ Oz. 55c; Oz. \$1.80.

W1600 Variety Mixture. Lg. Pkt. 20c; ¼ Oz. 50c; Oz. \$1.60.

PRINCESS ASTERS

A new type with full deep crested centers surrounded by several rows of dainty plume-like guard petals. The 3-3½" blossoms are borne on 2-2½' stalks. Free flowering, early and a good shipper.

W1093 Princess Bonnie, Salmon rose: Lg. Pkt. 35c; ¼ Oz. 80c; Oz. \$2.75.

W1090 Mixed Colors: Lg. Pkt. 30c; ¼ Oz. 65c; Oz. \$2.50.

NEW EARLY GIANTS

These Early Giants have just about reached perfection. They bloom early, are wilt resistant and the large flowers with broad gracefully intertwined petals are borne on long stems on which few laterals are produced.

	Lg. Pkt.	¼ Oz.	Oz.
W1822 Rose Marie. Bright rose	\$.35	\$.85	\$3.00
W1823 Peach Blossom.....			
W1824 Light Blue.....			

CREGO ASTERS

Also called "Ostrich Feather" Asters. Large flowers with long twisted petals. Bloom with Early Beauty and American Branching.

W1401 White	W1404 Azure Blue
W1402 Shell Pink	W1405 Purple
W1403 Deep Rose	

ABOVE COLORS: Lg. Pkt. 25c; ¼ Oz. 55c; Oz. \$1.80.

W1400 Variety Mixture. Lg. Pkt. 20c; ¼ Oz. 50c; Oz. \$1.60.

EARLY BEAUTY ASTERS

W1900 Mixed Colors. One of the most desirable of the early flowering types with well formed flowers of good clear colors and excellent keeping qualities. Bloom with Cregos and American Branching. 2½-3' tall. This, as well as all our mixtures, is made by blending separate colors: white, shell pink, rose and purple.

Lg. Pkt. 25c; ¼ Oz. 55c; Oz. \$1.80.

PEERLESS PINK

W1066. This is still the most popular light pink aster. Large double flowers on vigorous plants.

Lg. Pkt. 25c; ¼ Oz. 55c; Oz. \$1.80.

HEART OF FRANCE

W1078. The gorgeous red color is not duplicated in any other variety.
Lg. Pkt. 30c; 1/4 Oz. 85c; Oz. \$2.75.

BALL'S SELECTIONS

These are improved forms of the American Branching Asters particularly valuable because of their long sturdy stems and the large size of the full double flowers.

	Lg. Pkt.	1/4 Oz.	Oz.
W1081 Ball White Early.....	\$.30	\$.60	\$2.00
W1082 Ball White Late.....	.25	.55	1.80
W1083 Ball Deep Rose.....			
W1085 Ball Purple.....			

ROYAL ASTERS

W1300 Variety Mixture. Same form as American Branching but a little earlier. We blend equal amounts of white, shell pink, rose, lavender and purple for this mixture.
Lg. Pkt. 20c; 1/4 Oz. 50c; Oz. \$1.60.

QUEEN OF THE MARKET

W1200 Variety Mixture. The best early. Comes into bloom in early August. Contains equal amounts of white, rose, lavender, purple.
Lg. Pkt. 20c; 1/4 Oz. 45c; Oz. \$1.50.

NON-WILT RESISTANT ASTERS

If grown in non-infected soil these varieties are sturdy enough to give very good results.

IMBRICATED POMPONS

W1100 Mixed Colors. Similar to Pompon Chrysanthemums but providing colors not available in "mums." Planted close and grown under cloth the stems are good length for cutting. Grown outdoors the whole plant is cut at one time. Blooms early September. Rich scarlet, purple, lavender, rose and white in our mixture.
Lg. Pkt. 30c; 1/4 Oz. 75c; Oz. \$2.75.

VICTORY GIANTS

W1700 Mixed Colors. Enormous flowers with shaggy reflexed petals. Long clean stems. Colors are light pink, shades of salmon, rose, shades of blue, white and striped. Earlier than the other large informal flowered types.
Lg. Pkt. 35c; 1/4 Oz. 85c; Oz. \$3.00.

SINGLE CALIFORNIA GIANTS

W1830 Mixed Colors. Immense single daisy-like flowers with small bright yellow centers. Long graceful petals in shades of pink, rose, lavender and purple.
Lg. Pkt. 20c; 1/4 Oz. 50c; Oz. \$1.60.

AGERATUM

Our stocks are the most uniform available from seed. Sow in January for spring pot plants; February for bedding plant sales.

W2011 LITTLE BLUE STAR. Particularly valuable because of its earliness and the abundance of small warm blue flower heads held well above the foliage.
Lg. Pkt. 25c; 1/4 Oz. 70c; Oz. \$2.50.

W2012 MIDGET BLUE. Very dwarf compact plants which are low mounds of soft blue all summer.
Lg. Pkt. 45c; 1/8 Oz. 95c; 1/4 Oz. \$1.70; Oz. \$5.25.

W2013 BLUE BEDDER. One of the finest varieties from seed since it produces such large flower clusters on uniformly dwarf plants.
Lg. Pkt. 30c; 1/8 Oz. 60c; 1/4 Oz. \$1.10; Oz. \$3.50.

W2014 BLUE BALL. The large showy flower clusters make this the most popular for pot plants, combinations and window boxes as well as borders.
Lg. Pkt. 35c; 1/8 Oz. 70c; 1/4 Oz. \$1.20; Oz. \$4.00.

ALYSSUM

BALSAM

W2110 BRILLIANT MIXTURE. The ever popular Lady Slipper is always in demand for spring plant sales.
1/4 Oz. 30c; Oz. 90c.

W2115 BUSH FLOWERED MIXED COLORS. Flowers like camellias are held above the foliage on compact bushy plants 18" high. Colors: white, rose and red.
Lg. Pkt. 25c; 1/4 Oz. 60c; Oz. \$1.80.

BEGONIAS

The following are the outstanding varieties in the dwarf to intermediate class of fibrous rooted begonias. All of them make bushy plants that are unexcelled as pot plants, bedding material or in combinations.

W2132 PRIMA DONNA. Rose pink shading to carmine at the center.

W2133 LUMINOSA. Deep fiery scarlet with dark foliage.

W2130 MIXED COLORS. A well balanced blend of white, pinks and red.

ABOVE COLORS: 1000 Seeds 50c; 1/4 Oz. \$1.50; 1/2 Oz. \$2.25.

W2134 KING OF REDS. Compact plants, a mass of glowing scarlet blooms and bronzy foliage. The most popular red.
1000 Seeds 75c; 1/4 Oz. \$2.50; 1/2 Oz. \$4.50.

BELLIS (English Daisy)

As much a part of spring as pansies and forget-me-nots. Large flowering and double.

CARNATION (Annual)

W2290 GIANT DOUBLE CHAUBAUD MIXED COLORS. An especially fine range of colors in this always popular annual.
Lg. Pkt. 35c; ¼ Oz. 85c; Oz. \$3.00.

CASTOR BEAN (Ricinus)

W2500 Tropical Mixture. Oz. 25c; ¼ Lb. 75c.

CELOSIA (Cockscomb)

FEATHERED OR PLUMED TYPES

W2376 DWARF FIRE FEATHER. Uniformly dwarf, compact, many branched plants. The silky plumes are a rich fiery crimson.
Lg. Pkt. 30c; ⅛ Oz. 70c; ¼ Oz. \$1.20; Oz. \$4.00.

W2377 DWARF GOLDEN FEATHER. Rich golden yellow that combines well with Fire Feather.
Lg. Pkt. 30c; ⅛ Oz. 70c; ¼ Oz. \$1.20; Oz. \$4.00.

W2375 DWARF PLUMED MIXED COLORS. Contains not only vivid reds and yellows, but many tones of these as well as rose and creamy white.
Lg. Pkt. 35c; ⅛ Oz. 75c; ¼ Oz. \$1.30; Oz. \$4.25.

W2370 THOMPSONI MAGNIFICA, TALL MIXED. Graceful feathery plumes, 2 to 2 ½ ft. Many shades of reds and yellows.
Lg. Pkt. 20c; ¼ Oz. 55c; Oz. \$1.75.

CRESTED TYPE (CRISTATA)

W2380 FINEST DWARF MIXED COLORS. Enormous combs in shades of yellow, orange, rose, and red on 10-12 inch plants.
Lg. Pkt. 25c; ¼ Oz. 60c; Oz. \$2.00.

CHRYSANTHEMUM (Annual)

W2400 MIXED COLORS. Single daisy-like flowers with striking color combinations. Long lasting cut flowers.
¼ Oz. 15c; Oz. 40c.

HARRIS' EXTRA FANCY COLEUS

CENTAUREA (Bachelor Button)

W2325 DOUBLE BLUE FLORIST'S STRAIN. A very fine strain of the tall all-double bright blue used by florists for cut flowers. Try a fall sowing for early summer cutting.
¼ Oz. 20c; Oz. 50c; ¼ Lb. \$1.50.

	¼ Oz.	Oz.	¼ Lb.

W2340 SWEET SULTAN Mixed Colors.....	.25	.75	

CLEOME (Spider Plant)

W2416 PINK QUEEN. Increasingly popular for mass plantings in parks, etc. Blooms continuously from July until frost. Be ready with plenty of plants this spring.
Lg. Pkt. 25c; ¼ Oz. 50c; Oz. \$1.75.

COLEUS

W2511 Harris' Extra Fancy Mixture. We grow this seed ourselves and know it is far superior to any coleus on the market. The color combinations are unusually showy; all dull and unattractive ones have been taken out. The plants are low and compact.
Lg. Pkt. 50c; ¼ Oz. 90c; ⅛ Oz. \$2.75; ⅛ Oz. \$5.00.

W2510 RAINBOW MIXTURE. A good strain containing many attractive colors.
Lg. Pkt. 30c; ⅛ Oz. 75c; ¼ Oz. \$2.00; Oz. \$6.50.

COSMOS

Cosmos have become a profitable cut flower crop since the introduction of Sensation Hybrids because of their enormous size, earliness and good keeping qualities.

W2469 RADIANCE. All America winner 1948. Deep rosy red with broad band of crimson in center. Larger than the Sensations and with strong erect growth. Long lasting cut flower.
Lg. Pkt. 40c; ¼ Oz. 85c; Oz. \$3.00.

"The Paramount Giant Petunias sold on sight, I have grown them for twelve years and have never had a failure."
Alfred L. Riegel, Catawissa, Pa. 6/18/46

DAHLIAS

W2606 UNWIN'S DWARF HYBRIDS. A February sowing of these annual dahlias will provide an abundance of long stemmed cut flowers from August until October. Colors range from vivid reds, through soft pinks, yellow and orange to pale buff. Plants 1 1/2 to 2 ft. **Lg. Pkt. 25c; 1/8 Oz. 40c; 1/4 Oz. 70c; Oz. \$2.50.**

DIANTHUS (Pinks)

W2670 HEDDEWEGI DOUBLE MIXED COLORS. Large single to semi-double fragrant blooms in a wide range of colors. **1/4 Oz. 35c; Oz. \$1.15.**

W2680 HEDDEWEGI GAIETY. Large single and semi-double deeply fringed flowers in an unusual array of colors. Very popular edging plant. **Lg. Pkt. 30c; 1/4 Oz. 60c; Oz. \$2.00.**

DRACAENA (Spikes)

W2750 Indivisa. Still very popular for window box and urn plantings. **Oz. 75c; 1/4 Lb. \$2.25.**

DUSTY MILLER

W2355 Cineraria Maritima, Diamond. Fine cut foliage; uniform growth. The best Dusty Miller for edging, window boxes and combinations. **1/4 Oz. 25c; Oz. 85c.**

FORGET-ME-NOT (Myosotis)

W3493 ALPESTRIS, ROYAL BLUE. The standard biennial type so popular for spring plant sales with pansies and bellis. **Lg. Pkt. 35c; 1/8 Oz. 50c; 1/4 Oz. 90c; Oz. \$3.00.**

W3496 VICTORIA, WHITE. The Victoria varieties are very compact and upright admirably adapted for borders, baskets, combinations and bedding.

W3497 VICTORIA, ROSE

W3498 VICTORIA, BLUE

ABOVE COLORS: Lg. Pkt. 40c; 1/8 Oz. 65c; 1/4 Oz. \$1.10; Oz. \$3.75.

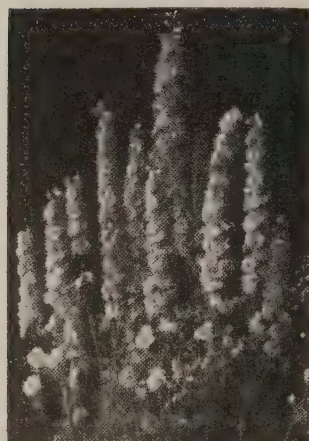

W3495 VICTORIA MIXED COLORS. **Lg. Pkt. 35c; 1/8 Oz. 60c; 1/4 Oz. \$1.00; Oz. \$3.50.**

GAILLARDIA

W2900 Double Annual, Mixed Colors. Double flowers of orange, yellow, red, rose and many variegations of these colors. Long lasting cut flower. **Lg. Pkt. 20c; 1/4 Oz. 50c; Oz. \$1.60.**

GOURDS

W2985 Small Sorts Mixed. A good mixture of the most easily grown and popular varieties. Find a ready sale in the autumn. **1/4 Oz. 20c; Oz. 45c; 1/4 Lb. \$1.50.**

IMPERIAL LARKSPUR

ANNUAL DIANTHUS

GYPSOPHILA

W2992 Covent Garden. No other variety has the large flowers and good keeping qualities of this one. Make successive sowings several weeks apart. **Oz. 30c; 1/4 Lb. 85c; Lb. \$2.25.**

HELICHRYSUM (Strawflowers)

W3070 Double Mixed Colors. Easily grown from seed sown outdoors in May. Always popular for fall sales. **Lg. Pkt. 15c; 1/4 Oz. 30c; Oz. \$1.00.**

HELIOTROPE

W3132 Dwarf Regale Mixed. The best heliotrope available from seed. Compact plants 15 in. tall with very large heads of rich purple. Very fragrant. **Lg. Pkt. 40c; 1/8 Oz. 75c; 1/4 Oz. \$1.25.**

KOCHIA (Summer Cypress)

W3190 CHILDSII. This new strain makes a quick growing, compact bright green hedge which remains green until late fall. **1/4 Oz. 10c; Oz. 25c.**

LARKSPUR

A sowing outdoors in late August or September produces a good spring cut flower crop. The Super Majestics are a recent improvement of the Imperials, making a stronger, taller growth than any variety thus far produced.

SUPER MAJESTICS

	Lg. Pkt.	1/4 Oz.	Oz.
W3241 Majestic, White.....	\$.20	\$.45	\$1.50
W3242 Majestic, Rose.....	.20	.45	1.50
W3245 Majestic, Lavender...	.20	.45	1.50

IMPERIAL or BASE BRANCHING

Because of their clean upright growth and the wide range of colors in this class, the Imperials are still outstanding larkspurs for outdoor or greenhouse work.

W3248 Los Angeles Improved. Salmon rose.

W3249 Rosalind, Salmon Rose

W3252 Carmine King. Rich, bright carmine.

W3254 Blue Bell. Mid blue.

W3255 Lilac Spire.

W3256 White King. Large white.

W3258 Blue Spire. Deep violet blue.

ABOVE COLORS: Lg. Pkt. 20c; 1/4 Oz. 40c; Oz. \$1.10; 1/4 Lb. \$3.50.

W3250 VARIETY MIXTURE

Our own mixture of the above seven best kinds.

Lg. Pkt. 15c; 1/4 Oz. 35c; Oz. \$1.00; 1/4 Lb. \$3.15.

LOBELIA

W3300 CRYSTAL PALACE COMPACTA. Rich dark blue flowers and dark, often bronzy foliage. **Lg. Pkt. 35c; 1/8 Oz. 45c; 1/4 Oz. 85c; Oz. \$3.00.**

W3301 CAMBRIDGE BLUE. Light blue flowers above light green foliage. **1/8 Oz. 45c; 1/4 Oz. 85c.**

W3302 BEDDING QUEEN. Very dwarf with medium green foliage; large deep blue flowers with white eye. **1/8 Oz. 45c; 1/4 Oz. 85c.**

LUPINS

W3315 HARTWEGI MIXED COLORS. Good long stemmed annual cut flower for greenhouse or garden. **1/4 Oz. 20c; Oz. 60c.**

MARIGOLDS

A February sowing produces pot plants for Easter. April plantings give transplants for which there is an unlimited demand. We have taken the guesswork out of ordering by offering only the best varieties in the various classes.

EARLY DWARF VARIETIES

W3413 GOLD CREST. Grows only 6 to 8 in. high but has 2 in. golden yellow flowers. The center is of crested quilled petals which are surrounded by several rows of guard petals. Very early, free flowering.

W3414 YELLOW PYGMY. Small yellow double flowers on very compact dwarf plants. Excellent for early potted plants.

W3416 SPRY. Very early flowering double golden yellow and red. Especially good for early pots.

W3417 SCARLET GLOW. Double flowers all red and mahogany.

W3418 BUTTERBALL. Harmony type with both the crested center and guard petals a clear golden yellow very lightly tipped with red.

W3419 MELODY. A double golden yellow of Harmony type. Uniformly 12 to 15 in. tall and early.

W3421 LITTLE GIANT. (Scotch or *Tagetes signata*). An improved strain. Small single yellow flowers and finely cut foliage.

W3422 HARMONY. Still one of the most popular. Golden center with red guard petals.

W3432 SUNKIST. Masses of rich orange flowers an inch in diameter. Uniformly dwarf, compact.

ABOVE VARIETIES: Lg. Pkt. 20c; 1/4 Oz. 45c; Oz. \$1.50.

W3410 HARRIS' DWARF VARIETY MIXTURE. Made up of equal parts of the finest, very dwarf varieties. Spry, Butterball, Sunkist, Pygmy and Gold Crest. Lg. Pkt. 20c; 1/4 Oz. 40c; Oz. \$1.25.

W3433 FLASH. The single flowers 1 1/2 in. across are a bright combination of colors from vivid red through burnished copper to bright yellow. Plants uniformly compact, 18 in. tall. Blooms in 8 weeks from seed. Very easy to grow. Lg. Pkt. 25c; 1/4 Oz. 60c; Oz. \$2.00.

W3434 NAUGHTY MARIETTA. All-America winner in '47. Plants uniformly 15" tall—Flowers a warm yellow with mahogany spot at base are 2" across—Unsurpassed for bedding or cut flowers. Lg. Pkt. 35c; 1/4 Oz. \$1.00; Oz. \$3.50.

TALL VARIETIES

Chrysanthemum-Flowered Marigolds

W3408 MAMMOTH MUM. Recently introduced, this has become a "must" for plant sales, outdoor and greenhouse cut flowers. Color a soft yellow; size 3 to 3 1/2 in. across. Lg. Pkt. 25c; 1/4 Oz. 75c; Oz. \$2.00.

Carnation-Flowered

W3407 SUNSET GIANTS20	.50	1.60

MARIGOLD, NAUGHTY MARIETTA

MATRICARIA (*Feverfew*)

W3441 Double White. There is a general demand for long stemmed white flowers during the summer months. Sown in January and planted out in the spring *Matricaria* is ready for cutting in July and August.

Lg. Pkt. 25c; 1/8 Oz. 40c; 1/4 Oz. 75c.

MIGNONETTE

W3431 Florists' Strain. A new early strain with large bright flower spikes on long stems. Because of its fragrance, very popular as a filler for bouquets.

1/4 Oz. 30c; Oz. \$1.00.

MORNING GLORY

W3475 HEAVENLY BLUE. Grow some of these in our Bird Plant Bands. The plants are in good demand and bring a good price. This is by far the most satisfactory variety.

Lg. Pkt. 15c; 1/4 Oz. 25c; Oz. 75c.

NASTURTIUM

W3610 GLEAM HYBRIDS. Large double blooms in shades of yellows, orange, salmon and gold. Oz. 25c; 1/4 Lb. 90c; Lb. \$2.75.

W3625 DWARF EMPEROR MIXED. Very dwarf compact plants with flowers held above the foliage. Rich colors. Oz. 30c; 1/4 Lb. \$1.10; Lb. \$3.25.

NEMESIA

W3650 NANA COMPACTA, TRIUMPH MIXED. Very showy pot plant for spring sales. This is the dwarf type growing only 6 inches high. Lg. Pkt. 15c; 1/4 Oz. 60c; Oz. \$2.00.

NICOTIANA (*Tobacco Plant*)

	Lg. Pkt.	1/4 Oz.	Oz.
W3671 Affinis, White	\$.15	\$.20	\$.60
W3672 Crimson Bedder25	.60	2.00
W3670 Mixed Colors15	.20	.60

NIEREMBERGIA (*Cupflower*)

W3664 PURPLE ROBE. The new deep lavender cup-flower so popular for edging. Uniformly dwarf and compact. Seedlings are more vigorous than plants from cuttings. Lg. Pkt. 40c; 1/3 Oz. \$1.65.

PANSIES

W3705 SWISS GIANTS. Magnificent Mixture. By actual tests every year on our farm, this strain of mammoth-flowered pansies has proved to be the best. The color range includes the dark browns and reds as well as the bright shades, and is the choice of pansy critics.

Lg. Pkt. 40c; 1/8 Oz. \$1.35; 1/4 Oz. \$2.15; Oz. \$6.50; 1/4 Lb. \$23.00.

W3704 DWARF SWISS GIANTS. MIXED COLORS.

A dwarf strain of Swiss Giants having the immense size and all the colors of the finest Swiss Giants. The dwarf habit of growth makes them especially desirable for spring plant sales.

Lg. Pkt. 40c; 1/8 Oz. \$1.50; 1/4 Oz. \$2.25; Oz. \$7.00; 1/4 Lb. \$26.00.

W3703 MAPLELEAF GIANTS. MIXED COLORS.

These are among the largest flowered of any pansies. Stems are long, the plants large, the colors rich and varied.

Lg. Pkt. 45c; 1/8 Oz. \$1.75; 1/4 Oz. \$2.75; Oz. \$9.00.

W3700 EARLY MARKET. MIXED COLORS.

The finest low priced mixture we have ever offered. They start flowering very early and the plants are low and compact with flowers in a pleasing range of bright colors held well above the foliage.

Lg. Pkt. 30c; 1/8 Oz. \$1.25; 1/4 Oz. \$2.00; Oz. \$6.00; 1/4 Lb. \$22.00.

PANSIES IN SEPARATE COLORS

W3735 WHITE SWISS. Large creamy white. Compact plants bloom continuously through the summer.

W3736 SWISS ROSE SHADES. Fills a long felt need for the "pink" pansies your customers always ask for.

W3737 CORONATION GOLD. Rich golden yellow so popular for bedding and edging.

W3738 SWISS BLUE. Large dark blue that combines beautifully with the other colors.

W3739 SWISS RED. Rich mahogany red with just enough variation to give them "class."

ABOVE COLORS: Lg. Pkt. 40c; 1/8 Oz. \$1.60; 1/4 Oz. \$2.50; Oz. \$7.50.

VIOLAS

Because they produce such an abundance of bloom over so long a season, Violas are among the most popular bedding plants. Jersey Gem is a true perennial; the other two listed are biennial.

Lg. Pkt. 1/8 Oz. 1/4 Oz.

W3762 CHANTREYLAND.

W3760 MIXED COLORS **.30 .90 1.50**

W3765 JERSEY GEM **.50 2.00**

The Finest BEDDING PETUNIAS

Harris Grown Seed

There is probably no flower in which there is such a wide range of quality in seed stocks. *That's why we grow our own petunias.* Only by constant breeding and selection can vigor of plants, uniformity of height, trueness to color and good germination be maintained. Petunia seed growing is a painstaking job. Much thought, time and labor goes into its production, but is justified, we know, when our stocks are compared with many on the market today.

W3840 HARRIS' SPECIAL FOUR-COLOR MIXTURE. Here is an unusually fine mixture especially made up for particular buyers. We make this mixture from fresh new-crop seed, using carefully balanced proportions of Celestial Rose, White Perfection, Dark Purple and Heavenly Blue.

Lg. Pkt. 30c; 1/8 Oz. 60c; 1/4 Oz. \$1.05; Oz. \$3.25.

W3821 WHITE PERFECTION. A new white, more uniform in growth and of the same compact habit as Celestial Rose. Most white petunias are much taller.

Lg. Pkt. 35c; 1/8 Oz. 70c; 1/4 Oz. \$1.15; Oz. \$4.00.

W3825 DARK PURPLE. A very much improved stock, very compact growing and a deep velvety dark blue-purple.

Lg. Pkt. 35c; 1/8 Oz. 70c; 1/4 Oz. \$1.15; Oz. \$4.00.

W3826 CELESTIAL ROSE. The finest all-purpose bright pink. A clear pink without the large white throat of Rosy Morn. This is the most compact and uniform strain available.

Lg. Pkt. 35c; 1/8 Oz. 70c; 1/4 Oz. \$1.15; Oz. \$4.00.

W3827 HEAVENLY BLUE. Improved. This is the light blue so much in demand but generally very variable in color. We have finally produced a much improved strain. The color is 100% true clear, light blue and the plants uniformly low and compact.

Lg. Pkt. 35c; 1/8 Oz. 70c; 1/4 Oz. \$1.15; Oz. \$4.00.

W3845 FINEST BEDDING VARIETIES MIXTURE.

For growers whose plant customers want a wide range of color in mass plantings of dwarf petunias. Contains seed of separate varieties of white, cream, soft pink, rose, salmon, blue, violet and purple.

Lg. Pkt. 30c; 1/8 Oz. 60c; 1/4 Oz. \$1.05; Oz. \$3.25.

W3852 BRIGHT EYES. This is the loveliest color in a new race of petunias which are very dwarf and compact. The miniature plants are literally covered all season with small Rosy Morn blossoms—soft pink with a white throat.

Lg. Pkt. 40c; 1/8 Oz. 80c; 1/8 Oz. \$1.50; 1/4 Oz. \$2.50; Oz. \$7.50.

W3836 BLACK PRINCE. The color of Flaming Velvet but more dwarf. Similar also to Velvet Ball. Our stock is uniformly dwarf and the color a very deep rich red, with no off-color plants in our seed crop.

Lg. Pkt. 45c; 1/8 Oz. \$1.10; 1/8 Oz. \$1.80; 1/4 Oz. \$3.25; Oz. \$10.50.

W3834 HOWARD'S STAR. Crimson-maroon with a distinct five pointed white star. A little taller than the dwarf bedding types.

Lg. Pkt. 30c; 1/8 Oz. 60c; 1/4 Oz. \$1.05; Oz. \$3.00.

W3847 ENGLISH VIOLET. Our All-American winner in 1943. Mass plantings look like huge English Violet corsages. The 15 in. plants are covered with rich violet color all season.

Lg. Pkt. 40c; 1/8 Oz. 75c; 1/8 Oz. \$1.25; 1/4 Oz. \$2.00; Oz. \$6.50.

W3853 TWINKLES. Very dwarf compact brilliant rose with a well defined pure white star.

Lg. Pkt. 30c; 1/8 Oz. 60c; 1/4 Oz. \$1.05; Oz. \$3.00.

W3851 IGLOO. Our All-American winner in 1943. A very compact low growing white with a soft yellow throat. Continuous mass of blooms throughout the season. One of the neatest and showiest. Its popularity is increasing each year.

Lg. Pkt. 40c; 1/8 Oz. 85c; 1/8 Oz. \$1.50; 1/4 Oz. \$2.50; Oz. \$7.50.

W3843 GLOW. The brightest light scarlet of all petunias. Since this was introduced we have been making our own selections and feel sure we are growing the most uniform strain, both in plant form and color, now available.

Lg. Pkt. 45c; 1/8 Oz. \$1.10; 1/8 Oz. \$1.80; 1/4 Oz. \$3.25; Oz. \$10.50.

W3833 TOPAZ QUEEN. A rich glowing carmine rose with golden throat. A little taller than the other low growing bedding varieties. Striking for bedding or pot plants.

Lg. Pkt. 35c; 1/8 Oz. 70c; 1/4 Oz. \$1.15; Oz. \$4.00.

W3822 SALMON SUPREME. Rich coral salmon changing to soft pink. Very low and compact.

Lg. Pkt. 45c; $\frac{1}{16}$ Oz. \$1.10; $\frac{1}{8}$ Oz. \$1.80; $\frac{1}{4}$ Oz. \$3.25; Oz. \$10.50.

W3844 CREAM STAR. By far the best creamy white petunia. Plants are uniformly compact and do not get leggy. Combines well with the deep reds and purples.

Lg. Pkt. 35c; $\frac{1}{8}$ Oz. 70c; $\frac{1}{4}$ Oz. \$1.15; Oz. \$4.00.

W3842 FIRST LADY. Also called Fair Lady. A clear rich silvery pink on very uniformly dwarf upright growing plants. Makes beautiful pot plants for spring sales.

Lg. Pkt. 35c; $\frac{1}{8}$ Oz. 70c; $\frac{1}{4}$ Oz. \$1.15; Oz. \$4.00.

W3823 ROSY MORN. An unusually good strain of the ever-popular white-throated pink for bedding, boxes, etc. The flowers are large and the plants remain uniformly low growing even during the extremely hot weather.

Lg. Pkt. 25c; $\frac{1}{8}$ Oz. 55c; $\frac{1}{4}$ Oz. 85c; Oz. \$2.80.

Harris' GIANT PETUNIAS

GIANT RUFFLED TYPE

W3802 HARRIS' PARAMOUNT GIANTS. If you could see the plants in our greenhouses being grown for a seed crop, you would agree with all who have seen them that they are by far the most exquisite California Dwarf Ruffled Giants you have ever seen. Immense, deep throated, beautifully ruffled and frilled flowers in a range of vivid and delicate colors are produced while the plants are still small, making them ideal for spring plant sales. Plants are compact and low growing.

500 seeds 75c; 1000 seeds \$1.25; $\frac{1}{64}$ Oz. \$2.50; $\frac{1}{32}$ Oz. \$4.25; $\frac{1}{16}$ Oz. \$7.50; $\frac{1}{8}$ Oz. \$13.00.

W3806 DWARF CALIFORNIA GIANTS, Mixed Colors. While not comparable to Harris' Paramount Giants this is a very good strain of seed grown in California. Interesting color range and the plants are fairly dwarf.

500 seeds 35c; 1000 seeds 60c; $\frac{1}{64}$ Oz. \$1.50; $\frac{1}{32}$ Oz. \$2.75; $\frac{1}{16}$ Oz. \$5.00; $\frac{1}{8}$ Oz. \$9.50.

W3808 HARRIS' SALMON BEAUTY. A giant, bright salmon-pink. Immense well ruffled flowers with golden throat. An excellent florist's variety. Similar to the new "Glamour."

1000 seeds 60c; $\frac{1}{64}$ Oz. \$1.25; $\frac{1}{32}$ Oz. \$2.00; $\frac{1}{16}$ Oz. \$3.50; $\frac{1}{8}$ Oz. \$6.50.

W3811 QUAKER LADY. Giant ruffled petals of a soft rosy lilac shading to pinkish white at the edges. Added elegance is attained by the veining of rich purplish blue which reaches into the deep open throat.

1000 seeds 60c; $\frac{1}{64}$ Oz. \$1.25; $\frac{1}{32}$ Oz. \$2.00; $\frac{1}{16}$ Oz. \$3.50; $\frac{1}{8}$ Oz. \$6.50.

ALL DOUBLE PETUNIAS

American Grown—100% Double

W3787 DOUBLE COLOSSAL SHADES OF ROSE. Colors range from salmony pink through rose pink to rosy mauve, beautifully fringed and ruffled. Plants wide spreading and 20 in. high.

W3786 DOUBLE WHITE. Very large fringed doubles; many $3\frac{1}{2}$ " across. Sturdy plants and free flowering. *Not ready for delivery until February.*

W3788 DOUBLE SALMON. Flowers of medium size but very double and fringed. Deep salmon with no tinge of magenta.

W3789 DOUBLE ORCHID. Large very double flowers produced in abundance on vigorous uniform plants. Soft orchid with purple veining.

ABOVE COLORS: 125 seeds \$1.00; 500 seeds \$2.50; 1000 seeds \$4.00; $\frac{1}{128}$ Oz. \$7.25.

W3785 DOUBLE GLORIOUS MIXED. The introducer has made up this mixture by using the above colors plus rose and purple. Small and semi double forms have been practically eliminated.

125 seeds 90c; 500 seeds \$2.00; 1000 seeds \$3.50; $\frac{1}{128}$ Oz. \$6.50.

W3772 DOUBLE AMERICA. The first 100% all double petunia ever created in America. Compact plants 1 ft. high and $1\frac{1}{2}$ ft. across. Large, rose-pink, carnation-flowered blooms are produced from early summer until frost.

100 seeds 40c; 200 seeds 75c; 1000 seeds \$3.00; $\frac{1}{128}$ Oz. \$6.00.

ALL HARRIS' GIANT PETUNIAS ARE HAND POLLINATED

GIANT WAVED TYPE

W3809 HARRIS' ROYALTY. Beautiful large velvety flowers in varying combinations of deep purple and white. Grown as a pot plant they are a "sell-out." Since we introduced this variety the demand has so increased that we have difficulty keeping up with it.

1000 seeds 60c; $\frac{1}{64}$ Oz. \$1.25; $\frac{1}{32}$ Oz. \$2.00; $\frac{1}{16}$ Oz. \$3.50; $\frac{1}{8}$ Oz. \$6.50.

W3814 HARRIS' GIANT SNOWSTORM. Very large, waved, pure white flowers on low growing plants. Blooms constantly in the garden and sells well as potted plants.

1000 seeds 60c; $\frac{1}{64}$ Oz. \$1.25; $\frac{1}{32}$ Oz. \$2.00; $\frac{1}{16}$ Oz. \$3.50; $\frac{1}{8}$ Oz. \$6.50.

W3816 HARRIS' PURPLE PRINCE. Not to be confused with any other "Purple Prince" offered. This is distinctly different; the largest flowered, deep velvety violet-blue. Large open throats and waved petals. Very free flowering.

1000 seeds 60c; $\frac{1}{64}$ Oz. \$1.25; $\frac{1}{32}$ Oz. \$2.00; $\frac{1}{16}$ Oz. \$3.50; $\frac{1}{8}$ Oz. \$6.50.

FRINGED TYPE

W3817 THE ART. Also called "Columbia." An exceptionally free-flowering fringed petunia in unusual color combinations of bright reds and white, mostly in blotches. Very effective for pot plant sales.

1000 seeds 60c; $\frac{1}{64}$ Oz. \$1.25; $\frac{1}{32}$ Oz. \$2.00; $\frac{1}{16}$ Oz. \$3.50; $\frac{1}{8}$ Oz. \$6.50.

W3819 HARRIS' SETTING SUN. One of the few really dwarf varieties of the fringed petunia class. It is a rich rose with a deeper throat and is heavily fringed. Pot plants command a premium price.

1000 seeds 60c; $\frac{1}{64}$ Oz. \$1.25; $\frac{1}{32}$ Oz. \$2.00; $\frac{1}{16}$ Oz. \$3.50; $\frac{1}{8}$ Oz. \$6.50.

W3815 FRINGED SNOWSTORM. Glistening white with a touch of yellow in the throat. Large beautifully fringed flowers are abundantly produced.

1000 seeds 60c; $\frac{1}{64}$ Oz. \$1.25; $\frac{1}{32}$ Oz. \$2.00; $\frac{1}{16}$ Oz. \$3.50; $\frac{1}{8}$ Oz. \$6.50.

W3813 THEODOSIA. We know we have the best strain of this popular bright pink with golden center. Large and well fringed.

1000 seeds 60c; $\frac{1}{64}$ Oz. \$1.25; $\frac{1}{32}$ Oz. \$2.00; $\frac{1}{16}$ Oz. \$3.50; $\frac{1}{8}$ Oz. \$6.50.

PHLOX

GRANDIFLORA

Plantings of annual phlox in our test gardens this summer convince us that we have the finest stock obtainable. The plants were uniformly 15" to 16" tall.

W3860 MIXED COLORS. In our trial grounds this mixture was a gorgeous blend of white, rose, scarlet, yellow, purple and scarlet and rose with white centers.

Lg. Pkt. 25c; 1/8 Oz. 45c; 1/4 Oz. 80c; Oz. \$2.50.

W3869 STARRED AND FRINGED. You should include some of these in your plants of bedding plants. Sell them once and you will create a continuous demand.

Lg. Pkt. 30c; 1/8 Oz. 50c; 1/4 Oz. 90c; Oz. \$2.75.

GRANDIFLORA GIGANTEA

The giganteas make a little stronger growth and have larger flowers than the grandifloras. One of the showiest annuals for bedding and borders.

W3859 ART SHADES MIXED. Enormous florets in all imaginable combinations of pastel colors; many with an eye of contrasting color.

Lg. Pkt. 40c; 1/8 Oz. 70c; 1/4 Oz. \$1.15; Oz. \$3.75.

DWARF TYPE

W3850 DWARF MIXED COLORS. Compact plants 6 to 8 in. high. Preferred by many for borders and mass planting. Ours is a mixture of a wide range of clear warm colors.

Lg. Pkt. 35c; 1/8 Oz. 60c; 1/4 Oz. \$1.00; Oz. \$3.25.

PORTULACA

W3870 DOUBLE MIXED COLORS. We make up this mixture from separate colors: scarlet, salmon, pink, striped, white, orange and yellow. One of the most admired items in our Trial Grounds. Plants of double portulaca are in great demand at our Roadside Stand.

Lg. Pkt. 35c; 1/8 Oz. 75c; 1/4 Oz. \$1.35; Oz. \$4.25.

SALVIA

W4600 HARRIS' BONFIRE. With florists, the name of Harris has become synonymous with superior quality and high germinating salvia seed. Ours is a strain of our own selection grown for us in the East by a salvia specialist. The spikes are large, long, and the florets placed very closely together. The growth is as uniform as though it had been sheared. The color is of a brighter shade than any other variety, and the germination higher.

Lg. Pkt. 30c; 1/8 Oz. 65c; 1/4 Oz. \$1.25; Oz. \$4.00; 1/4 Lb. \$14.00.

W4605 DWARF HARBINGER. We are fortunate in again being able to offer this dwarf and very dependable early flowering salvia so much in demand for spring pot and summer bedding plants. Leaves are a deep bluish green.

Lg. Pkt. 40c; 1/8 Oz. \$1.25; 1/4 Oz. \$2.00; Oz. \$6.50.

W4604 ST. JOHNS FIRE. This variety has all the most desirable qualities of a dwarf bedding plant. In full bloom in August remaining in perfect condition until frost. Ten to twelve inches tall and very uniform, compact and upright.

Lg. Pkt. 75c; 1/8 Oz. \$1.40; 1/4 Oz. \$2.50; Oz. \$7.50.

W4603 FARINACEA, Blue Bedder. Ideal for cutting. The 2 ft. plants produce an abundance of graceful sprays of soft blue.

Lg. Pkt. 35c; 1/8 Oz. 65c; 1/4 Oz. \$1.25; Oz. \$4.00.

SALPIGLOSSIS

W4500 LARGE FLOWERED MIXED. For cut flowers indoors or out there is no flower of richer color.

Lg. Pkt. 15c; 1/4 Oz. 30c; Oz. \$1.00.

SCABIOSA

Here is a cut flower for which there is an increasing demand. No other flower has such a wide range of rich colors. Grow them as a spring greenhouse crop. A summer crop may be had from transplants and a fall crop from seed sown outdoors.

W4647 Loveliness. Salmon Pink

W4648 Shasta. White

W4658 King of the Blacks. Very dark red

W4659 Fire King. Bright scarlet

W4650 MIXED COLORS

ABOVE 5 COLORS: 1/4 Oz. 30c; Oz. 75c; 1/4 Lb. \$2.25.

W4649 Salmon Beauty. Very large deep salmon

W4655 Blue Moon. Very large bright blue

W4665 IMPERIAL GIANTS, MIXED. A new race of scabiosas which far surpass any developed thus far. The plants are sturdier and freer flowering, the flowers larger, stems longer and the colors richer and more varied.

ABOVE 3 COLORS: Lg. Pkt. 20c; 1/4 Oz. 45c; Oz. \$1.50.

SCHIZANTHUS

W4635 DR. BADGER'S IMPROVED HYBRIDS. Sown in late winter these make beautiful specimens in 5 inch pots for Mother's Day. Rightly called "Poor Man's Orchid" since they resemble spray orchids. Of medium height, this is the finest variety for pots, bouquets and corsages.

Lg. Pkt. 35c; 1/8 Oz. 65c; 1/4 Oz. \$1.25; Oz. \$4.00.

STOCKS

HARRIS' "SURE-TO-BLOOM" STOCKS

Usually thought of as bedding plants, but grown also as pot plants for spring. The soft colors, spicy fragrance and neat compact growth adapt them admirably to this use. Our strain will bloom 100% from seed sown outdoors in May. Ultimate height 15 to 18 inches.

W6021 White

W6025 Dark Blue

W6022 Flesh Pink

W6026 Canary Yellow

W6023 Blood Red

W6027 Rose

W6024 Azure Blue

ABOVE COLORS: Lg. Pkt. 30c; 1/4 Oz. 70c; Oz. \$2.10.

W6020 VARIETY MIXTURE. Lg. Pkt. 20c; 1/4 Oz. 60c; Oz. \$1.80.

NEW GIANT IMPERIAL STOCKS

W6000 VARIETY MIXTURE. This is the branching type with a large percentage of doubles. One of the most profitable cold house bench crops for the grower-retailer who wants cut flower material over a long period. Requires 4½ months to mature a crop for Valentine's and Mother's Day.

Lg. Pkt. 35c; 1/8 Oz. 45c; 1/4 Oz. 85c; Oz. \$3.00.

HARRIS' COLOSSAL SNAPDRAGONS

SNAPDRAGONS

HARRIS' COLOSSAL

We can safely boast that these Harris' grown snapdragons have the huskiest growth, longest stems, largest flowers and finest colors of any on the market today. Outdoor grown spikes compare favorably with greenhouse stock. Particularly valuable for spring plant sales because of the rapid growth made by the sturdy seedlings. (*Not rust resistant.*)

- ABOVE COLORS: Lg. Pkt. 35c; 1/8 Oz. 80c; 1/4 Oz. \$1.50; Oz. \$4.50.

W5030 MIXED COLORS. Lg. Pkt. 30c; 1/8 Oz. 65c; 1/4 Oz. \$1.25; Oz. \$4.00.

W5039 VELVET GIANT. This All-America winner for 1947 stands out in any planting because of its tall, sturdy spikes and rich green foliage. The large, well formed florets of vivid crimson with a gold under-tone are closely spaced on tall stems.
Lg. Pkt. 35c; 1/8 Oz. 80c; 1/4 Oz. \$1.50; Oz. \$4.50.

TALL GIANT-FLOWERED SNAPDRAGONS

More rapid progress is being made in the development of these California grown rust resistant snapdragons than in any flower these days. New and better colors appear each year and resistance to rust is about 90%. Stems 2 to 2 1/2 feet may be cut from outdoor grown stock. Seed should be sown in early February for spring plant sales. (*Rust Resistant.*)

HALF-TALL SNAPDRAGONS

W5115 NEW COLOR MIXTURE. Rust resistant and growing 15 to 18 inches tall, these are admirably suited to border and mass plantings. Made up of bright colors, they are showy from early summer until late fall. If cut back and mulched over winter, they can often be carried over for spring bloom the following year.
Lg. Pkt. 25c; 1/8 Oz. 45c; 1/4 Oz. 85c; Oz. \$3.00.

SWEET PEAS

EARLY FLOWERING

The type best adapted for an early greenhouse planting or for early blooming outdoors. Our up-to-date list is composed of the best to be had.

- | | | | |

SUNFLOWER

W6195 Sungold. Sunflowers that grow only 4 to 5 ft. high but produce large 100% double flowers in great profusion. Plant them along the roadside or near your roadside stand.
1/4 Oz. 25c; Oz. 75c.

THUNBERGIA (Clock Vine)

W7940 Alata. This little vine having yellow and creamy white flowers with black centers is increasingly popular for urns and window boxes. 1/4 Oz. 30c; Oz. \$1.00.

TORENIA (Wishbone Flower)

W7955 Fournieri Compacta. We have an even compact strain of this charming bedding and edging plant. Stands up better than pansies in hot weather. The inch long flowers have a deep lavender standard and rich purple lip with a bright blotch.

$\frac{1}{32}$ Oz. 40c; $\frac{1}{16}$ Oz. 75c; $\frac{1}{8}$ Oz. \$1.25.

VERBENAS

MAMMOTH FLOWERING

Home gardeners will buy all the plants of verbenas you can grow. Since seed is slow to germinate sow it the last of February or early March in 65°-70° soil.

W8003 Rose Queen

W8007 Red Emperor

W8004 Lavender Glory

W8008 Snowstorm

W8005 Purple King

ABOVE COLORS: Lg. Pkt. 25c; $\frac{1}{8}$ Oz. 45c; $\frac{1}{4}$ Oz. 80c; Oz. \$2.75.

W8015 VARIETY MIXTURE. Lg. Pkt. 25c; $\frac{1}{8}$ Oz. 40c; $\frac{1}{4}$ Oz. 65c; Oz. \$2.25.

VINCA ROSEA (Periwinkle)

W8050 MIXED COLORS. One of the few annuals which will bloom in semi-shade. Grow some plants for your "good gardener" customers. The mixture contains pink, white with pink center and pink with a darker center.

Lg. Pkt. 25c; $\frac{1}{4}$ Oz. 65c; Oz. \$2.00.

ZINNIAS

A profitable spring plant crop because seedlings are just as satisfactory for plant sales as are the transplants. Seed may be sown in a hotbed in late April or early May for these.

A NEW GIANT ZINNIA MIXTURE

W8160 Giant "Two Tone" Light Color Mixture. Enormous flowers in pastel shades of rose, yellows, buff salmons, etc. The petals shade to yellow and gold at the base giving the flowers a two tone effect.

Lg. Pkt. 20c; $\frac{1}{4}$ Oz. 40c; Oz. \$1.10; $\frac{1}{4}$ Lb. \$3.50.

W8120 MAGNIFICENT VARIETY MIXTURE. A special mixture of all the kinds described above. **Lg. Pkt. 15c; $\frac{1}{4}$ Oz. 30c; Oz. 90c; $\frac{1}{4}$ Lb. \$3.00; Lb. \$9.00.**

W8150 GOLD MEDAL MIXTURE. A good quality lower priced mixture containing all the colors and shades grown as a mixture. **Lg. Pkt. 15c; $\frac{1}{4}$ Oz. 25c; Oz. 75c; $\frac{1}{4}$ Lb. \$2.50; Lb. \$7.50.**

ZINNIA GRACILLIMA

W8225 RED RIDING HOOD. Bright scarlet bedding plant 18 in. tall, producing masses of small, double blooms all summer. **Lg. Pkt. 20c; $\frac{1}{4}$ Oz. 40c; Oz. \$1.10.**

MAGNIFICENT MIXTURE GIANT ZINNIAS

CUT-&-COME-AGAIN

The medium size of this class makes them ideal for cut flowers. Many florists sow $\frac{1}{2}$ lb. or more outdoors in drill rows. These three are the most desirable colors developed thus far.

	Lg. Pkt.	$\frac{1}{4}$ Oz.	Oz.	$\frac{1}{4}$ Lb.
W8262 Salmon Rose				
W8263 Spun Gold	\$.15	\$.30	\$1.00	\$3.00
W8264 Scarlet				

W8260 SUNSHINE TINTS. A mixture of many new and unusual shades not yet available in separate colors. Be sure to include them in your zinnia plantings. **Lg. Pkt. 15c; $\frac{1}{4}$ Oz. 30c; Oz. 90c; $\frac{1}{4}$ Lb. \$2.75.**

NEW POMPON ZINNIAS

The flowers are small, full double and borne in profusion eight weeks from sowing. The plants sell well in the spring and they provide an abundance of cut flowers in the summer.

W8230 VARIETY MIXTURE. This is made by using equal quantities of eight different colors: white, salmon, yellow, scarlet, orange, purple, lilac and crimson. **Lg. Pkt. 15c; $\frac{1}{4}$ Oz. 25c; Oz. 75c; $\frac{1}{4}$ Lb. \$2.50.**

FANTASY ZINNIAS

W8285 MIXED COLORS. If well grown these are the most artistic of all zinnias, with their curled and twisted petals. Medium size flowers that make ideal cut flowers. **Lg. Pkt. 20c; $\frac{1}{4}$ Oz. 40c; Oz. \$1.10.**

MEXICAN ZINNIAS

W8280 HAAGEANA. Mixed Colors. The small single, semi-double and double blossoms an inch or less in diameter are variegated mahogany, red, orange yellow and cream, no two exactly alike in their markings. Height 12 to 15 inches. Continuous bloom. Since they are slower than the other zinnias, plant them a week or ten days earlier for sale as seedlings or transplants. **Lg. Pkt. 20c; $\frac{1}{4}$ Oz. 40c; Oz. \$1.10.**

CREeping ZINNIAS

W4686 SANVITALIA Procumbens. Grows only 4 to 5 in. high, spreads from 12 to 15 in. Small double bright yellow flowers with a dark eye. Blooms all summer. Excellent for edging, mass planting, and rock gardens. **$\frac{1}{4}$ Oz. 50c; Oz. \$1.65.**

CUPID ZINNIAS

W8220 VARIETY MIXTURE. A good bedding type more dwarf in habit than the Pompons bearing a profusion of very small double flowers. **Lg. Pkt. 20c; $\frac{1}{4}$ Oz. 40c; Oz. \$1.25.**

HARDY PERENNIAL SEED

There is an increasing demand for well grown perennial cut flowers of good quality. Perennial plants, too, are bringing very good prices. For sturdy plants that will winter over well, seed should be sown in May or early June.

AQUILEGIA (Columbine)

W2074 HARRIS' EXHIBITION HYBRIDS. Vigorous plants producing large long spurred flowers in a wide range of colors. Our breeding and selection have produced a strain that surpasses many in our trials. **Lg. Pkt. 35c; 1/4 Oz. 85c; Oz. \$3.00.**

W2075 LONG SPURRED BLUE SHADES.
Lg. Pkt. 40c; 1/4 Oz. \$1.00.

CARNATION

W2310 HARRIS' HARDY. Mixed Colors. We are firmly convinced that our strain of this popular perennial cannot be duplicated. Contains a large percentage of doubles and a fine range of colors. Seed is of our own growing. **Lg. Pkt. 50c; 1/4 Oz. \$2.25; Oz. \$7.00.**

CAMPANULA (Canterbury Bells)

W2230 CUP AND SAUCER MIXED COLORS.
Lg. Pkt. 20c; 1/4 Oz. 50c; Oz. \$1.50.

W2231 White **W2233 Deep Blue**
W2232 Rose **W2234 Light Blue**

ABOVE COLORS: Lg. Pkt. 25c; 1/4 Oz. 60c; Oz. \$2.00.

W2240 DOUBLE MIXED COLORS. Lg. Pkt. 20c;
1/4 Oz. 50c; Oz. \$1.50.

W2249 ALL VARIETIES MIXED COLORS.
Lg. Pkt. 20c; 1/4 Oz. 30c; Oz. \$1.00.

DELPHINIUM

Our seed grown here on our own farm comes from plants carefully selected for vigor, size of flower spikes and good color. It is fresh and of good germination.

W2641 HARRIS' MONARCH STRAIN. Our own selection of outstanding material from the best strains on the market. Grown under northern conditions and requires no coddling. **Lg. Pkt. 40c; 1/8 Oz. 75c; 1/4 Oz. \$1.25; Oz. \$4.00.**

W2642 HARRIS' DOUBLE WHITE (Galahad). Continued careful selection from 100% double flowers assures you of a high percentage of double, pure white flowers on vigorous plants. **Lg. Pkt. \$1.00; 1/8 Oz. \$2.00; 1/4 Oz. \$3.50; Oz. \$12.00.**

W2665 PACIFIC HYBRIDS. Flowers are mostly double and semi-double in a range of shades and combinations never before seen in delphiniums. **Lg. Pkt. \$1.00; 1/8 Oz. \$2.00; 1/4 Oz. \$3.50; Oz. \$12.00.**

W2645 BELLADONNA. The standard light blue for florists. **Lg. Pkt. 20c; 1/4 Oz. 60c; Oz. \$2.00.**

LUPINS

W3335 NEW RUSSELL, Harris' Supreme Mixture. We have been making selections from the originator's stock so the vigor and color range of pink, rose, buff, bronze, rust red and blues cannot be duplicated. **Lg. Pkt. 30c; 1/4 Oz. 55c; Oz. \$2.00.**

SWEET WILLIAM

W6132 NEWPORT PINK. The much wanted salmon-pink shade. **Lg. Pkt. 30c; 1/4 Oz. 65c; Oz. \$2.25.**

W6133 SCARLET BEAUTY. Vivid bright red. **Lg. Pkt. 30c; 1/4 Oz. 65c; Oz. \$2.25.**

W6130 MIXED COLORS. A beautiful blending of rich colors. **Lg. Pkt. 20c; 1/4 Oz. 50c; Oz. \$1.75.**

W6140 DWARF MIXED COLORS. Sown outdoors in the summer, this makes ideal clumps for early spring plant sales. **Lg. Pkt. 20c; 1/4 Oz. 50c; Oz. \$1.75.**

"Incidentally, it was a large planting of your Monarch strain of delphinium that launched me into a small nursery business. They are wonderful plants. Some I have are five or six years old and still going strong."

Mrs. Hollis D. Thurlow, Portland, Maine, June 12, 1946

You can depend on Harris perennial seed. Much of it is grown here on Moreton Farm from carefully selected stock. The following are the perennials that can be grown most satisfactorily from seed.

SPRAYS AND DUSTS

ARSENATE OF LEAD

Standard stomach poison for chewing insects. Use with hydrated lime as spray or dust.

1 lb. (makes 25 to 35 gal. of spray)..\$.40 postpaid

4 lb. (makes 100 to 150 gal. of spray). \$1.25 postpaid

BLACK LEAF 40

The best nicotine-sulphate insecticide, for control of aphid and leafhoppers, and for delousing poultry, etc. Economical.

5 Oz. (makes 10 to 40 gal. solution)..\$1.10 postpaid

1 lb. (4/5 pt.) (makes 30 to 120 gal.). 2.60 postpaid

2 lbs. \$3.80; 5 lbs. (2 qts.) \$7.25 postpaid.

BORDEAUX MIXTURE

Standard fungicide for controlling blight (including late blight on tomatoes), also mildew, rust, etc. on fruits and vegetables, also roses and delphinium.

1 lb. (makes 6 gal. solution).....\$.40 postpaid

4 lb. (makes 25 gal. solution)..... 1.10 postpaid

CALOMEL

The standard substance for treating seed of cabbage, cauliflower, etc. to control root maggot. Also used in solution for treating seed beds of cabbage, radishes, etc.

1/4 lb. (makes 20 to 40 gal. solution)..\$1.15 postpaid

1 lb. (makes 80 to 160 gal. solution).. 3.90 postpaid

CORROSIVE SUBLIMATE

Bichloride of Mercury. Used for treating seed potatoes for scab and rhizoctonia, lawns for brown patch, gladiolus for thrips, and on cabbage and cauliflower plants for maggots.

1/4 lb. (makes 30 to 50 gal. solution)..\$.95 postpaid

1 lb. (makes 120 to 200 gal. solution). 3.25 postpaid

COPPER SPRAY (COCS)

For control of tomato blight and cucumber and melon diseases. Safer and easier to use than Bordeaux.

1 lb. (makes 16 gal. spray).....\$.75 postpaid

3 lb. (makes 48 gal. spray)..... 1.30 postpaid

DDT SPRAY—50% DDT

The best form of DDT for agricultural purposes. Simply mix with water for spraying. Excellent for potatoes, cabbage, onions and many other crops. Very powerful and lasts longer than other insecticides.

1 lb. (makes 50 to 100 gal. solution)..\$1.00 postpaid

3 lbs..... 2.35 postpaid

DDT DUST—3% DDT

Now the standard dust to use for cabbage worms, onion thrips, corn borers, flea beetles and many other insects.

1 lb.....\$.40 postpaid

4 lb..... .95 postpaid

POTATOX

All purpose spray or dust for potatoes. Kills insects and controls blight. Contains DDT, Calcium Arsenate and Copper.

1 lb. (makes 14 gal. spray).....\$.55 postpaid

4 lb..... 1.60 postpaid

ROTENONE DUST (.75%)

Non-poisonous insecticide of great value to growers. Use on beans for bean beetles, cabbage and cauliflower for worms and on vine crops for all insects.

1 lb.....\$.50 postpaid

4 lbs..... 1.60 postpaid

50 lbs.....11.50 not prepaid

COPPER-ROTENONE DUST

The ideal combined insecticide and fungicide dust. The copper controls blights and diseases and the rotenone kills nearly all harmful insects. Especially recommended for all vine crops.

1 lb.....\$.55 postpaid

4 lbs..... 1.75 postpaid

50 lbs.....\$13.50 not prepaid

All prices here quoted are subject to change without notice, and to our stocks being unsold.

SEED TREATMENTS

ARASAN

For Most Vegetable Seeds. This is the best seed treatment we have found for spinach and beets, and it is also outstanding for corn, vine crop seeds, pepper and many others. Disinfects and protects the seed against organisms which cause rot, reduces damping off, and improves stands. Highly recommended.

1 Oz. 16c; 8 Oz. 80c; 4 lbs. \$5.16. Not prepaid.

SEMESAN

For Many Vegetable and Flower Seeds. Useful to protect seed from rotting and prevent damping off of seedlings. Use as a dry dust disinfectant for seeds and also a liquid for treating soils.

1/3 Oz. 12c; 2 Oz. 45c; 12 Oz. \$2.10; 4 lbs. \$10.10; 25 lbs. \$58.28. Not prepaid.

SEMESAN JR.

For Field Corn and Sweet Corn. Cheap and effective. Prevents corn from rotting in the ground and increases stands. 1 1/2 oz. treats 1 Bu. of seed.

1 1/2 Oz. 17c; 12 Oz. 65c; 6 1/4 lbs. \$4.16. Not prepaid.

CERESAN

For Wheat, Oats and all Grain. Effective dust for control of covered smut on wheat, oats and barley. 1/2 oz. treats 1 Bu. of seed.

4 Oz. 35c; 1 lb. 90c; 4 lbs. \$3.00. Not prepaid.

SEMESAN BEL

For Seed Potatoes. One pound treats 50 to 60 bu. of cut potatoes. For control of rhizoctonia and seed-born scab.

2 Oz. 35c; 1 lb. \$1.85; 4 lbs. \$6.35. Not prepaid.

SPERGERON

For Lima Beans, Peas, etc. Protects seed against decay, improves stands and actually stimulates growth. Highly recommended for lima beans and excellent for peas. Treated seed may be sown without graphite. 2 oz. treats 1 Bu. of seed.

1 Oz. 25c; 5 Oz. \$1.00; 1 lb. \$2.40; 5 lbs. \$10.50.

Prepaid.

CROW REPELLENT

If you are troubled with crows and other birds pulling up your seed corn, treat it with STANLEY'S CROW REPELLENT. Will not harm the seed or clog the planter.

1/2 pint (enough for 1 Bu.).....\$.60 postpaid

Pint (enough for 2 Bu.)..... 1.00 postpaid

Quart (enough for 4 Bu.)..... 1.75 postpaid

"OPEN-HED" SPRAYERS

These 4 gallon galvanized sprayers are sturdy and well made and we recommend them highly.

The seams are all electrically welded, and the sprayers are galvanized after the welding which prevents rusting and cracking along the seams. Equipped with double acting pump lock and double grip pump handle. Opening 5 in. in diameter for easy filling and cleaning.

No. 4D Open-Hed

Galvanized.....\$9.50

Transportation charges prepaid in the U. S. east of the Mississippi River and North of Tennessee.

For hand sprayers and dusters see our retail catalog.

Please check one: If we are out of any of the varieties ordered, shall we substitute others equally good ? ☐ or shall we return the money sent for them ? ☐

HOTKAPS

HOTKAPS are scientifically constructed wax paper cones, which are placed over the plant or hill of seeds. Their use enables the grower to set out his plants or plant his seed as soon as the ground is warm. They afford protection to the young plants from frost, wind and beating rains and insects.

- 100 with Fibreboard Setter. \$2.80 postpaid
- 250 with Fibreboard Setter. 4.95 postpaid
- 1000 to 4,000 without Setter
(wt. 28 lbs. per 1000)...\$13.50 per M not prepaid
- 5,000 to 10,000 without Setter
(wt. 28 lbs. per 1000)...\$13.25 per M not prepaid

HOTENT—Note the large size and sturdy construction.

HOTENTS

Larger area and taller, wire reinforced. See photo for size and shape. Measure 10½ x 14½ x 8½, or 152½ sq. in. at base. Will stand up under adverse conditions. Some of our customers have found *Hotents* especially valuable for growing melons and use many thousands each year.

- 500 (wt. 35 lbs.).....\$11.50 not prepaid
- 1000 or more.....\$22.00 per M not prepaid

We cannot ship less than 500 Hotents because cartons for packing smaller quantities are not available.

SUPER HOTENTS

The largest practical field forcer we know. Specially made paper reinforced with wire. Size 14" x 18" by 12" high.

- 500 (wt. 60 lbs.).....\$17.00 not prepaid
- 1000 or more.....\$33.00 per M not prepaid
(Now available only in cartons of 500.)

SETTERS

- HOTKAP Fibreboard Setters. Can be used for setting many hundred Hotkaps.....\$.20 each postpaid
- HOTKAP Steel Setters.....\$1.95 postpaid
- HOTENT Metal Setters (wt. 4 lbs.) . \$2.60 not prepaid
- SUPER HOTENT Metal Setters (wt. 6 lbs.)
\$3.60 each not prepaid

Note: Purchaser pays transportation on Hotkaps, Hotents, Super Hotents and Fertile Pots, except where quoted "postpaid." When ordering please be sure to tell us how to ship, whether by mail, express or freight.

"FERTILE" POTS

Now Better Than Ever

Our new formula assures a steadier and more even plant growth in these famous manure pots. Plants raised in them can be set out in the field, pots and all, without any check in growth. The pot disintegrates and furnishes just the right plant food for best growth. These pots save time and labor, and actually produce earlier fruit and better yields of Early Cabbage, Egg Plant, Peppers, Tomatoes, Melons, etc.

These pots are now carefully packed in new strong divided cartons, especially designed to prevent breakage in transit.

- No. 2½ (about 2½" outside diameter):
 - Carton of 60..... \$1.60 postpaid
 - Carton of 250 (wt. about 18 lbs.) \$3.50 not prepaid
 - 1000 or more.....\$13.00 per M not prepaid
- No. 3 (about 3" outside diameter):
 - Carton of 60.....\$1.80 postpaid
 - Carton of 250 (wt. about 25 lbs.) \$4.00 not prepaid
 - 1000 or more.....\$15.00 per M not prepaid

TWISTEMS—8 IN.

Excellent for bunching vegetables and flowers, tying up plants, etc. Labor saving, quick and attractive. 8 in. long—the most popular size.

- 1000 to 9000.....\$1.70 per M postpaid
- 10,000 to 24,000\$1.55 per M not prepaid
- 25,000 or more.....\$1.50 per M not prepaid
(Weight—about 1 lb. per 1000)

Write for information and prices on 12-in. Twistems

PLANT BANDS

Bird Vita-Band 10

These low-cost fibre bands are ideal for growing vegetable plants and annual flowers for 8 to 10 weeks. They are treated with nutrients inside to give well-balanced vigorous growth, with larger root systems, and they are much more economical of space than round pots. Easy to set-up and remove.
